MONTHLY REVIEW
OF
CANADIAN FISHERIES STATISTICS
JANUARY 1954

In JANUARY the sea-fishermen of CANADA (Newfoundland included) caught 91,712,000 pounds of fish worth \$2,544,000. During the same month of 1953 they landed 44,252,000 pounds valued at \$2,639,000, so that while there was an increase in quantity of 107.2 p.c., the value decreased by 3.6 p.c.

The ATLANTIC COAST catch -- 31,257,000 pounds worth \$1,735,000 -- was lower by 16.0 and 29.4 p.c., respectively than in January, 1953. Landings of cod and herring were greater, but those of all other species declined. N.B. The above figures include statistics for Newfoundland.

The PACIFIC COAST catch in January amounted to 60,455,000 pounds worth \$809,000 to the fisherman. Landings of herring were much lower than is normal for this month. In comparing them with last year's catch it must be remembered that in January, 1953, herring seining was almost at a standstill due to strike action. With regard to reduced landings of other species, reports indicate that small boat operations were greatly hampered by adverse (i.e. Eastern) weather conditions.

EXPORTS of fish and fish products during the year 1953 amounted to \$114,376,000, 2.4 p.c. below the total for 1952. Sales of canned salmon were higher, particularly to the United Kingdom, and, to a lesser extent, to the U.S.A. and Belgium. Exports of fresh and frozen fillets, almost wholly to the U.S. market, were 2.3 p.c. above the 1952 level.

REVUE MENSUELLE DE LA STATISTIQUE DES PÊCHERIES CANADIENNES

JANVIER 1954

En JANVIER, les pêcheurs maritimes du CANADA (Terre-Neuve comprise) ont pris 91,712,000 livres de poisson d'une valeur de \$2,544,000. Durant le même mois de 1953, ils en avaient débarqué 44,252,000 livres d'une valeur de \$2,639,000. Ainsi, bien qu'il y ait eu augmentation de 107.2 p. 100 de la quantité, la valeur a diminué de 3.6 p 100.

La prise sur la COTE DE L'ATLANTIQUE, - 31,257,000 livres d'une valeur de \$1,735,000, - a été inférieure de 16.0 et 29.4 p. 100 respectivement à celle de janvier 1953. Les débarquements de morue et de hareng ont augmenté mais ceux des autres espèces ont diminué. A noter que les chiffres ci-haut comprennent ceux de Terre-Neuve.

Sur la COTE DU PACIFIQUE, la prise de janvier a été de 60,455,000 livres d'une valeur de \$809,000. Les débarquements de hareng ont été de beaucoup inférieurs à la normale pour le mois. En les comparant à ceux de l'an dernier, on ne doit pas oublier qu'en janvier 1953, la prise de hareng avait été presque nulle par suite des grèves. Relativement aux débarquements réduits des autres espèces, les rapports indiquent que les petites embarcations ont vu leur travail grandement réduit par suite du mauvais temps.

Les EXPORTATIONS de poisson et de produits du poisson en 1953 se sont chiffrées par \$114,376,000, recul de 2.4 p. 100 sur le total de 1952. Les ventes de saumon en conserve ont augmenté, particulièrement au Royaume-Uni et, dans une moindre mesure, aux Etats-Unis et en Belgique. Les exportations de filets frais et congelés, - exportations presque exclusivement sur les marchés américains, - ont surpassé de 2.3 p. 100 le niveau de 1952.

EDMOND CLOUTIER, C.M.G., O.A., D.S.P.
QUEEN'S PRINTER AND CONTROLLER OF STATIONERY—IMPRIMEUR DE LA REINE ET CONTRÔLEUR DE LA PAPETERIE
Ottawa, 1954

In FEBRUARY the sea-fishermen of CANADA (Newfoundland included) landed 58,019,000 pounds of fish valued at \$1,725,000. During the same month of 1953 they caught 35,784,000 pounds worth \$1,458,000. Landings were, therefore, 62.1 p.c. greater, and landed values 18.3 p.c. higher than in February, 1953.

The ATLANTIC COAST catch -- 29,238,000 pounds worth \$1,278,000 -- was higher by 7.2 and 5.0 p.c. respectively than a year ago. Landings of cod, haddock and rose-fish were greater, especially in Newfoundland. However, the catches of lobsters, smelts and pollock were appreciably lower.

The PACIFIC COAST catch -- 28,781,000 pounds worth \$447,000 -- compares favourably with that taken in February, 1953, but would still appear to be below normal for the month. Landings of all species of shellfish continue to decline in value, with clams showing the sharpest reduction.

STOCKS of all frozen fish amounted to 36,400,000 pounds on March 1st, 34,851,000 pounds being frozen fresh, and 1,549,000 pounds frozen smoked.

EXPORTS of fish and fish products in January amounted to \$8,449,000 an increase of 1.1 p.c. over the comparable figure for January, 1953.

LANDINGS IN THE SEA FISHERIES OF CANADA

MILLION POUNDS

MILLION POUNDS

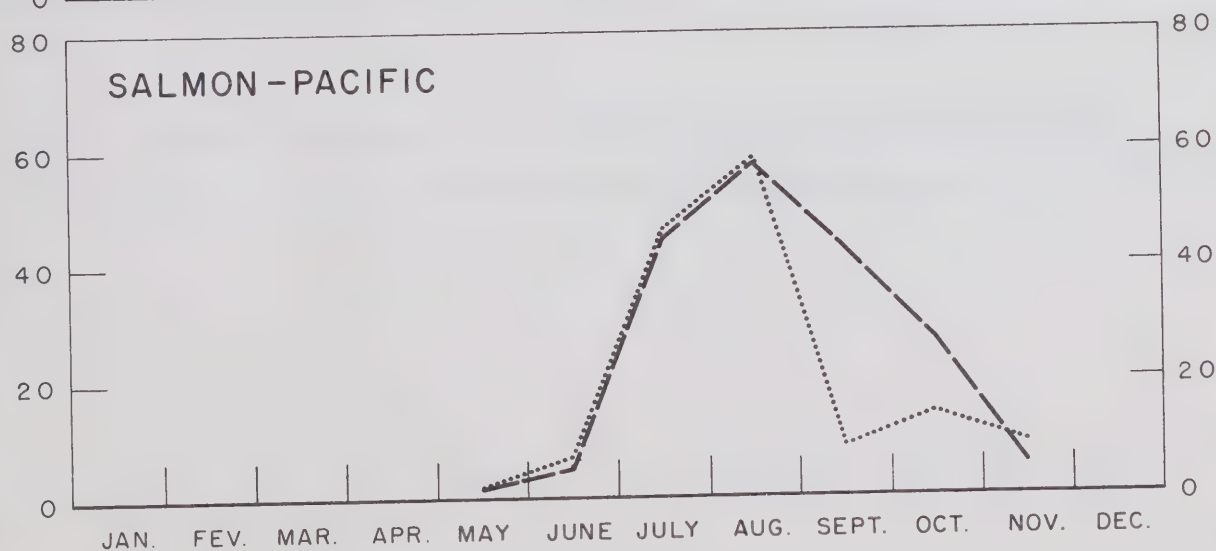

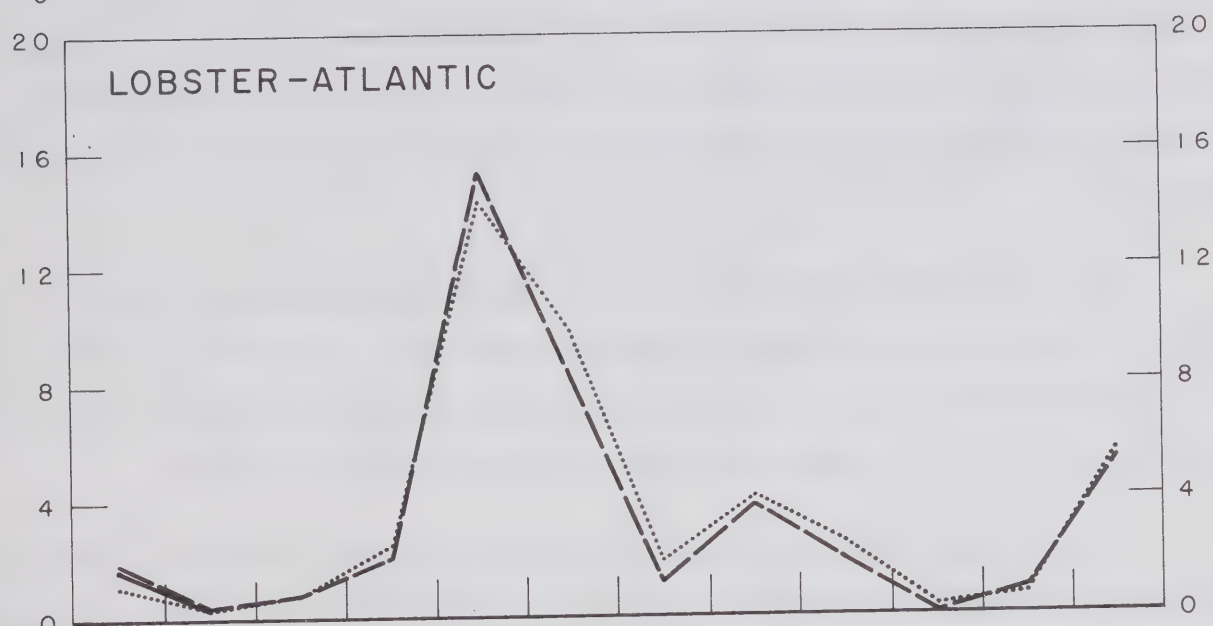

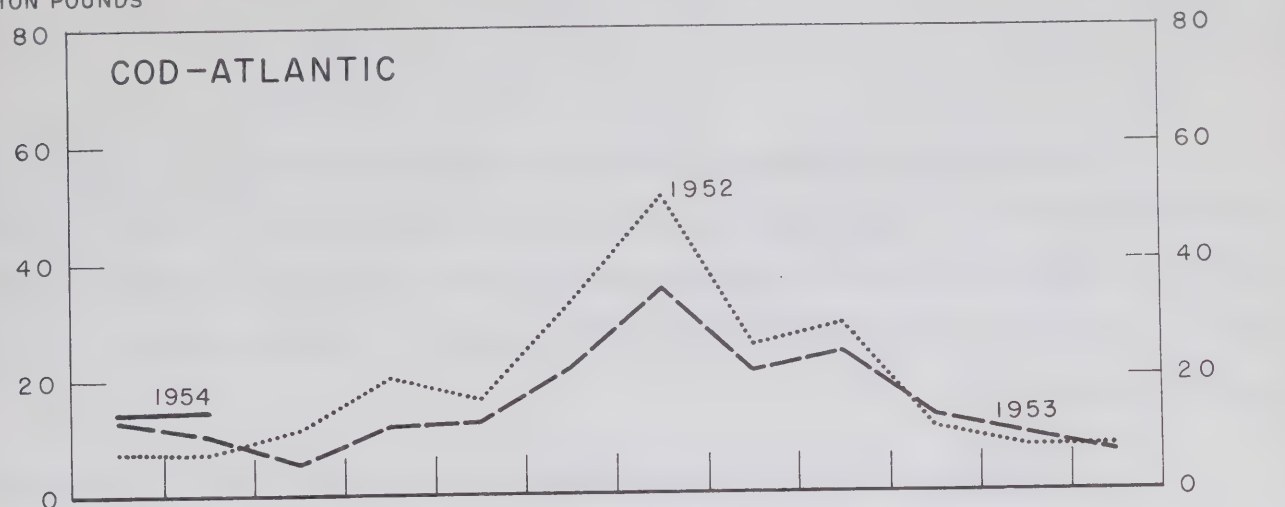

LANDINGS IN THE SEA FISHERIES OF CANADA

CONTINUED

MILLION POUNDS

MILLION POUNDS

En FEVRIER, les pêcheurs maritimes du Canada (Terre-Neuve comprise) ont débarqué 58,019,000 livres de poisson d'une valeur de \$ 1,725,000. Durant le même mois de 1953, ils en avaient pris 35,784,000 livres d'une valeur de \$ 1,458,000. Les débarquements ont donc en conséquence augmenté de 62.1 p. 100 et la valeur débarquée, de 18.3 p. 100 au regard de février 1953.

La prise sur la COTE DE L'ATLANTIQUE, - 29,238,000 livres d'une valeur de \$ 1,278,000, - a été supérieure de 7.2 et 5.0 p. 100 respectivement à celle d'un an auparavant. Les débarquements de morue, d'aiglefin et de chèvre ont augmenté, particulièrement à Terre-Neuve. Cependant, il y a eu diminution appréciable de la prise de homard, d'éperlan et de merlan.

Sur la COTE DU PACIFIQUE, la prise, - 28,781,000 livres d'une valeur de \$ 447,000, - se compare favorablement à celle de février 1953, mais est encore inférieure à la normale pour le mois. La valeur des débarquements de toutes espèces de crustacés a continué à diminuer et les palourdes ont accusé la réduction la plus prononcée.

Les STOCKS de tous les poissons congelés s'élevaient à 36,400,000 livres le 1^{er} mars, dont 34,851,000 livres de poisson congelé frais et 1,549,000 livres de poisson congelé fûmé.

Les EXPORTATIONS de poisson et de produits du poisson en janvier se sont élevées à \$ 8,449,000, augmentation de 1.1 p. 100 sur le total comparatif de janvier 1953.

CANADIAN FISHERIES - MARCH, 1954

CANADA

In March the sea-fisheries of Canada (including Newfoundland) yielded a catch of 96,081,000 pounds of fish worth \$2,614,000 to the fisherman as compared to one of 36,302,000 pounds worth \$1,721,000 taken in the same month of 1953. This huge increase may be attributed almost wholly to the fact that last year the B. C. herring fishery was curtailed greatly by strike action.

ATLANTIC

On the Atlantic Coast total landings and landed values were -- with last year's figures and the percentage differences in brackets -- 34,350,000 pounds (31,123,000 pounds, plus 10.4 p.c.) and \$1,627,000 (\$1,490,000, plus 9.2 p.c.).

In Newfoundland landings of codfish, haddock and catfish were higher, both during the month and in the first quarter of the year. Other fisheries would appear to be running below last year's levels.

The New Brunswick total catch was higher than in March, 1953. The sardine fishery seems to have got off to an earlier start this year.

In Nova Scotia landings and landed values -- 20,669,000 pounds and \$1,275,000 -- were up by 23.8 and 8.7 p.c. respectively in March. Totals for the first three months of the year were 54,648,000 pounds (plus 4.4 p.c.) and \$3,484,000 (minus 4.5 p.c.) To date the lobster fishery would seem to be running below the 1953 level, both in catch and unit price.

PACIFIC

British Columbia reports landings and landed values of 61,731,000 pounds and \$987,000 as compared with 5,179,000 pounds and \$231,000 in March, 1953, when herring-seining operations were affected very sharply by strike action. Heavy production in the Queen Charlotte Islands area boosted the 1954 monthly herring value to \$713,000.

The lingcod catch during March was more than double that of a year ago. This increase in volume coupled with the effect of firm prices raised the landed value to \$64,000 from \$24,000.

STOCKS

Holdings of all frozen fish in Canada amounted to 28,596,000 pounds on April 1st, of which 24,206,000 pounds were frozen fresh and 4,390,000 pounds frozen smoked. Stocks of dried-salted fish totalled 3,923,000 pounds as against 3,473,000 pounds on the same date a year ago.

EXPORTS

Exports of fish and fish products during January and February totalled \$17,759,000 -- an increase of 1.9 p.c. over last year's figure of \$17,430,000. More canned salmon, fish meal and lobsters were sold abroad than in the same two months of 1953.

LANDINGS IN THE SEA FISHERIES OF CANADA

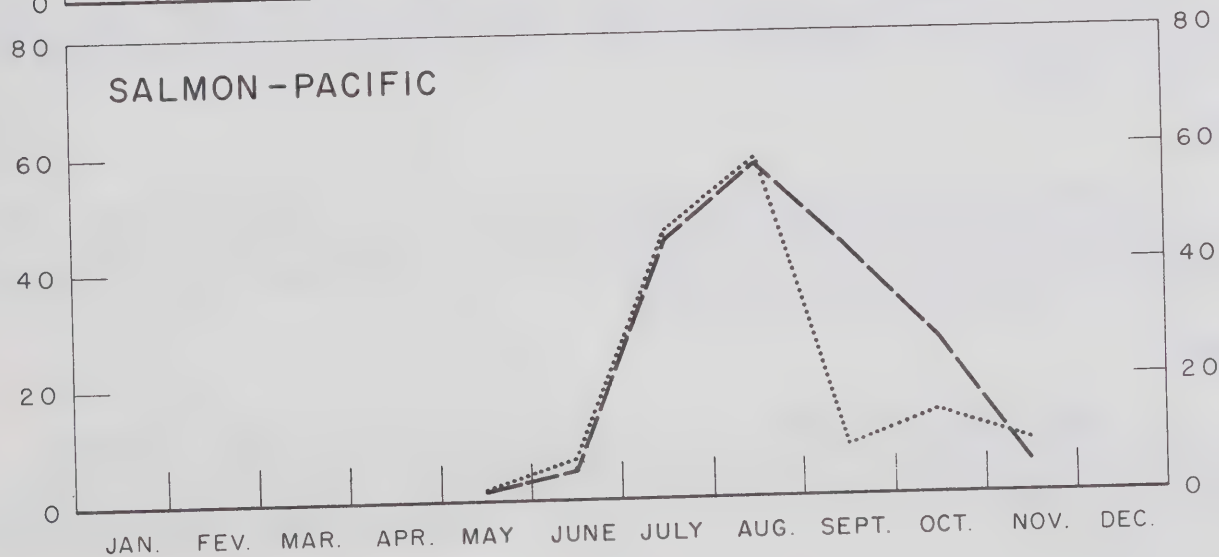

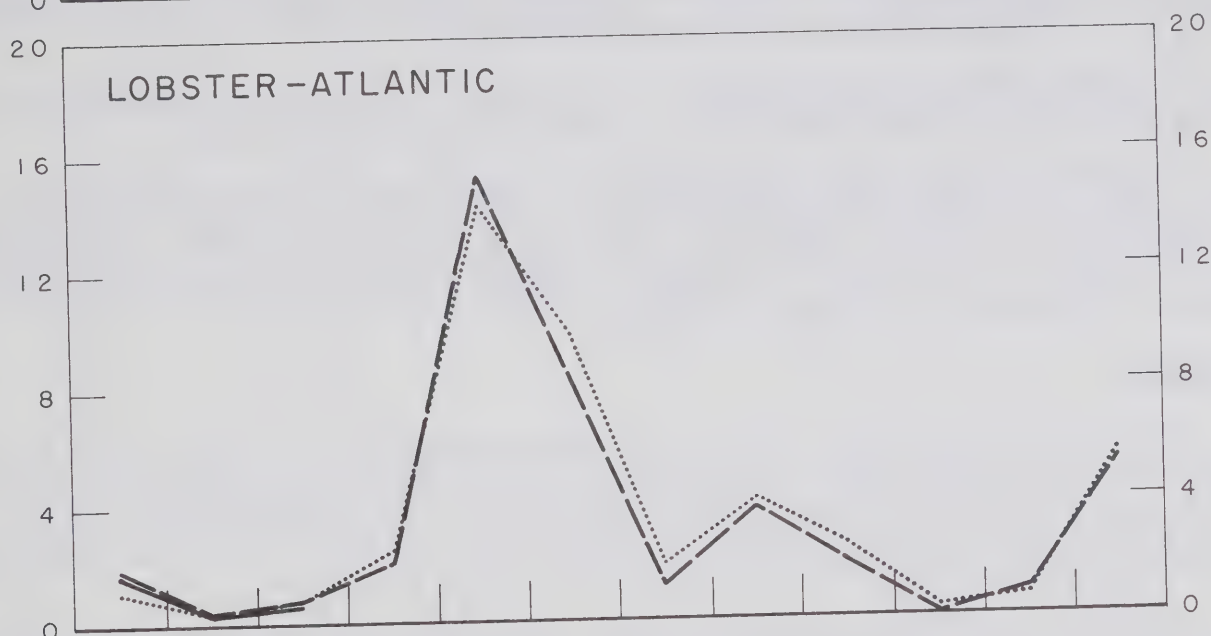

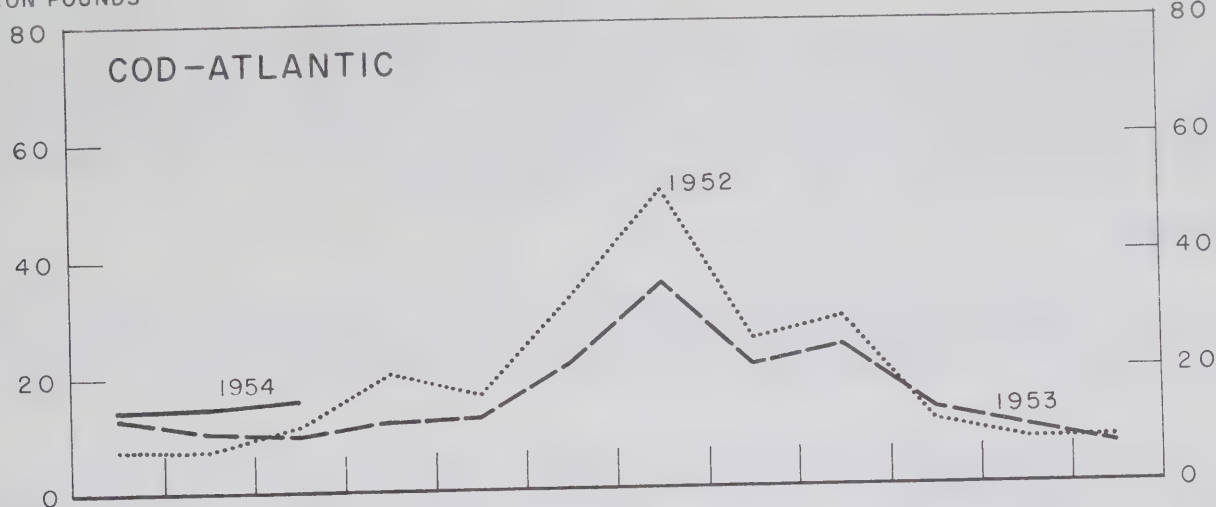

LANDINGS IN THE SEA FISHERIES OF CANADA

CONTINUED

MILLION POUNDS

MILLION POUNDS

CANADA

Au Canada (y compris Terre-Neuve), les débarquements de poissons de mer, en mars, se sont établis à 96,081,000 livres évaluées à \$2,614,000 par rapport à 36,-302,000 livres et à \$1,721,000 le mois correspondant de 1953. Cette augmentation énorme est due presque entièrement à la grève qui, l'an dernier, a sérieusement réduit la pêche du hareng dans la Colombie-Britannique.

ATLANTIQUE

Sur la côte de l'Atlantique, les débarquements et leur valeur, comparés à ceux de mars 1953 (entre parenthèses, la différence de pourcentage), se sont chiffrés par 34,350,000 livres contre 31,123,000 (+ 10.4 p. 100) et \$1,627,000 contre \$1,490,000 (+ 9.2 p. 100).

A Terre-Neuve, les débarquements de morue, d'églefin et d'annarrhique-loup ont augmenté en mars et durant le premier trimestre, mais, la prise des autres poissons semble être inférieure à celle des années précédentes.

La prise totale du Nouveau-Brunswick l'emporte sur celle de mars 1953 et les débarquements de sardine, paraît-il, ont commencé plus tôt, en 1954.

En Nouvelle-Ecosse, les débarquements et leur valeur (20,669,000 livres et \$1,275,000) ont monté respectivement de 23.8 et de 8.7 p. 100 en mars. Les chiffres cumulatifs pour le premier trimestre étaient de 54,648,000 livres (+ 4.4 p. 100) et de \$3,484,000 (- 4.5 p. 100). La prise et le prix d'unité du homard sont vraisemblablement inférieurs aux niveaux de 1953.

PACIFIQUE

La Colombie-Britannique déclare des débarquements de 61,731,000 livres et une valeur débarquée de \$987,000 en comparaison de 5,179,000 livres et de \$231,000 en mars 1953, alors que la pêche à la seine du hareng a été considérablement réduite sous l'effet de la grève. Une forte production dans les îles de la Reine-Charlotte ont élevé la valeur mensuelle de la prise de hareng à \$713,000.

La pêche de la lingue, en mars, a plus que doublé celle de mars 1953. Cette augmentation, jointe à la fermeté des prix, a fait grimper la valeur débarquée de \$24,000 à \$64,000.

STOCKS

Les stocks de tous les poissons gelés, le 1^{er} avril, s'établissaient à 28,-596,000 livres dont 24,206,000 de poisson frais et 4,390,000 de poisson fumé. Les stocks de poisson salé à sec se chiffraient par 3,923,000 livres contre 3,473,000 à la date correspondante de l'an dernier.

EXPORTS

Les exportations de poisson et de produits du poisson, durant janvier et février, ont été évaluées à \$17,759,000, augmentation de 1.9 p. 100 sur les \$17,-430,000 de l'année précédente. Durant la même période, on a vendu outre-mer plus de saumon en conserve, de farine de poisson et d'huîtres qu'au cours des deux mêmes mois, en 1953.

CANADIAN FISHERIES - APRIL, 1954

CANADA

In April the sea-fishermen of Canada (Newfoundland included) caught 64,221,000 pounds of fish worth \$3,143,000 compared to a catch of 75,900,000 pounds valued at \$2,767,000 taken in April, 1953.

ATLANTIC

On the Atlantic Coast landings and landed values were -- with last year's figures and the percentage differences in parentheses -- 60,351,000 pounds (71,563,000 pounds, minus 15.7 p.c.), and \$2,866,000 (\$2,425,000, plus 18.2 p.c.).

In Newfoundland the volume of landings was lower, both for the month of April and for the first four months of the year, but the value in either case was slightly above last year's level.

The New Brunswick sardine fishery continues to give better returns to the fisherman than in 1953.

The Nova Scotia total landings and landed values -- 28,911,000 pounds and \$2,328,000 -- were 11.3 and 25.0 p.c. higher respectively than in April, 1953. The cod fishery continues its improvement in comparison with last year, but returns to the lobsterman are still slightly lower for the four month period under review.

PACIFIC

In British Columbia landings of 3,870,000 pounds of fish were valued initially at \$277,000. They were, therefore, 10.8 and 19.0 p.c. lower respectively than the figures for April, 1953.

Clams were in demand, the total catch of 740,000 pounds being two and one-half times the figure for last April. The reported value was \$20,000 as compared to \$7,000 a year ago.

STOCKS

Holdings of all frozen fish in Canada amount to 26,488,000 pounds on May 1st, of which 23,940,000 pounds were frozen fresh and 2,548,000 pounds frozen smoked. Stocks of dried-salted fish (mainland only) totalled 3,377,000 pounds as against 3,923,000 pounds on the same date a year ago.

EXPORTS

Exports of fish and fish products during the first three months of 1954 amounted to \$28,748,000 -- an increase of 7.5 p.c. over last year's total for the comparable period. Sales of canned salmon, fish meal and lobsters to foreign markets continue on the same higher levels that have been noted in previous months of this year.

PECHERIES CANADIENNES - AVRIL 1954

CANADA

Au Canada (y compris Terre-Neuve), les débarquements de poissons de mer, en avril, se sont établis à 64,221,000 livres d'une valeur de \$3,143,000 par rapport à 75,900,000 livres et à \$2,767,000 le mois correspondant de 1953.

ATLANTIQUE

Sur la côte de l'Atlantique, les débarquements et leur valeur, comparés à ceux de mars 1953 (entre parenthèses, la différence de pourcentage), se sont chiffrés par 60,351,000 livres contre 71,563,000 (- 15.7 p. 100) et \$2,866,000 contre \$2,425,000 (+ 19.0 p. 100).

En avril et durant les quatre premiers mois de 1954, le volume de la pêche a diminué à Terre-Neuve, mais la valeur y a augmenté légèrement, au regard des périodes correspondantes de l'an dernier.

Au Nouveau-Brunswick, la prise de sardines apporte toujours aux pêcheurs de meilleures recettes qu'en 1953.

En Nouvelle-Ecosse, les débarquements et leur valeur (28,911,000 livres et \$2,328,000) ont monté respectivement de 11.3 et de 25.0 p. 100 sur avril 1953. Si la pêche de la morue obtient de nouveau un volume plus élevé, cependant les recettes se maintiennent à un niveau légèrement plus bas.

PACIFIQUE

En Colombie-Britannique, les débarquements (3,870,000 livres) ont été évalués provisoirement à \$277,000. Ces chiffres sont donc inférieurs de 10.8 et de 19.0 p. 100 aux chiffres correspondants d'avril 1953.

Les coques étaient en demande et leur prise a atteint le total de 740,000 livres, soit deux fois et demi le volume d'avril 1953. La valeur déclarée a été de \$20,000 en comparaison de \$7,000 un an plus tôt.

STOCKS

Les stocks de tous les poissons gelés, le 1^{er} mai, s'établissaient à 26,488,000 livres, dont 23,940,000 livres de poisson frais et 2,548,000 de poisson fumé.

EXPORTATIONS

Les exportations de poisson et de produits du poisson, durant le premier trimestre de 1954, ont été évaluées à \$28,748,000, augmentation de 7.5 p. 100 sur la valeur correspondante de 1953. Au cours de la même période, on a observé, comme dans les premiers mois de 1954, un accroissement des ventes de saumon en conserve, de farine de poisson et d'huîtres.

CANADIAN FISHERIES - MAY 1954

CANADA

In May the sea-fisheries of Canada (Newfoundland included) yielded 151,314,000 pounds of fish worth \$8,663,000 -- 0.7 and 1.5 p.c. less respectively than the May, 1953, catch of 152,325,000 pounds valued at \$8,793,000.

ATLANTIC

East Coast landings and landed values were -- with last year's figures and the percentage differences in parentheses -- 136,020,000 pounds (138,054,000 pounds; minus 1.5 p.c.), and \$6,863,000 (\$7,147,000; minus 3.8 p.c.).

In Newfoundland total landings and landed values were lower than for the same month of last year. However, the cod and haddock fisheries continue to give better returns than in 1953.

The New Brunswick sardine fishery seems to be much more lucrative this year, but the lobster catch is greatly reduced from last year's level.

The Nova Scotia catch and catch value -- 49,328,000 pounds and \$3,878,000 -- were 18.9 and 4.9 p.c. higher respectively than in May, 1953. All the major species were landed in greater quantities, with one exception -- lobster. However, higher unit prices have raised the total cumulative value for the 'king of the crustaceans' to a point only slightly below last year's figure for the same five-month period.

PACIFIC

On the Pacific Coast landings of 15,294,000 pounds of fish valued at \$1,800,000 were higher by 9.4 and 10.6 p.c. respectively than the figures for May, 1953.

The halibut catch was lower in volume, but slightly higher unit prices resulted in an overall increase in value. In comparison with May, 1953, all species of shellfish were taken in greater quantities this year.

STOCKS

Holdings of all frozen fish in Canada amounted to 32,066,000 pounds on June 1st, of which 29,548,000 pounds were frozen fresh and 2,518,000 pounds frozen smoked.

EXPORTS

Exports of fish and fish products during the first four months of this year totalled \$35,504,000 -- \$2,293,000 or 6.9 p.c. higher than during the same period of 1953. With the sole exception of 'fresh and frozen, whole or dressed', all categories showed increases.

MILLION POUNDS

MILLION POUNDS

COD-ATLANTIC

LOBSTER-ATLANTIC

SALMON-PACIFIC

CANADA

Au Canada (y compris Terre-Neuve), les débarquements de poissons de mer, en mai, se sont établis à 151,314,000 livres d'une valeur de \$8,663,000, diminution respective de 0.7 et de 1.5 p. 100 sur les 152,325,000 livres et les \$8,793,000 du mois correspondant de 1953.

ATLANTIQUE

Sur la côte orientale, les débarquements et leur valeur, comparés à ceux d'avril 1953 de mai 1953 (entre parenthèses, la différence de pourcentage), se sont chiffrés par 136,020,000 livres contre 138,054,000 (-1.5 p. 100) et \$6,863,000 contre \$7,147,000 (- 3.8 p. 100).

A Terre-Neuve, la prise et sa valeur ont diminué au regard du mois correspondant de l'an dernier, mais les débarquements de morue et d'églefin ont augmenté de valeur.

Au Nouveau-Brunswick, la pêche de sardines apporte apparemment de meilleures recettes en 1954, mais la prise de homard est largement inférieure à celle de l'an dernier.

En Nouvelle-Ecosse, les débarquements et leur valeur (49,328,000 livres et \$3,878,000) ont monté respectivement de 18.9 et de 4.9 p. 100 sur mai 1953. Tous les principaux poissons, sauf le homard, ont enregistré des débarquements accrus. Néanmoins, au cours des cinq premiers mois, l'augmentation des prix unitaires a élevé la valeur débarquée du "roi des crustacés" à un degré légèrement inférieur à celui de l'an dernier.

PACIFIQUE

Sur la côte du Pacifique, les débarquements (15,294,000 livres) ont été évalués à \$1,800,000. Ces chiffres sont donc inférieurs de 9.4 et de 10.6 p. 100 aux chiffres correspondants de mai 1953.

Si le volume du flétan a décru, par contre la légère augmentation des prix unitaires a accru sa valeur générale. La pêche de tous les crustacés et mollusques a été supérieure à celle de mai 1953.

STOCKS

Les stocks de tous les poissons gelés, le 1er juin, s'établissaient à 32,066,000 livres, dont 29,548,000 livres de poisson frais et 2,518,000 de poisson fumé.

EXPORTATIONS

Les exportations de poisson et de produits du poisson, durant les quatre premiers mois de 1954, ont été évaluées à \$35,504,000, augmentation de \$2,293,000 ou de 6.9 p. 100 sur la valeur correspondante de 1953. Sauf le poisson frais et gelé, entier ou habillé, toutes les catégories de poisson ont enregistré un accroissement de valeur.

CANADIAN FISHERIES - JUNE 1954

CANADA

In June the sea-fishermen of Canada (Newfoundland included) caught 184,331,000 pounds of fish worth \$9,746,000 initially, as against 178,391,000 pounds worth \$9,793,000 in June, 1953. Landings, therefore, were 3.3 p.c. heavier, but 0.5 p.c. less valuable than in the same month of last year.

Cumulative figures for the first six months of 1954 were -- with last year's comparable figures and the percentage differences in parentheses -- 645,325,000 pounds (525,263,000 pounds; plus 22.8 p.c.) and \$28,357,000 (\$27,144,000; plus 4.5 p.c.).

ATLANTIC

East Coast landings and landed values were -- again with last year's figures and the percentage differences in brackets -- 170,746,000 pounds (160,255,000 pounds; plus 6.5 p.c.) and \$7,754,000 (\$7,132,000; plus 8.7 p.c.).

For the six-month period under review the catch was 468,479,000 pounds (465,793,000 pounds; plus 0.6 p.c.), whilst the catch value was \$22,131,000 (\$21,859,000; plus 1.2 p.c.). A decrease in the aggregate value of the lobster fishery, caused by lower unit prices, would appear to have been more than offset by larger catches of groundfish.

In Newfoundland total landings and landed values were higher than in 1953, both in June and during the January-June period.

The New Brunswick sardine fishery is still running above last year's level, but the aggregate value of the lobster catch is down by 21.9 p.c.

Nova Scotia landings and landed values -- 48,925,000 pounds and \$2,841,000 -- were 6.7 p.c. smaller, but 0.1 p.c. more valuable than in June, 1953. Lobster prices seem to have declined this month.

PACIFIC

The Pacific Coast catch of 13,585,000 pounds valued at \$1,992,000 was lower in both cases by 25.1 p.c. than in June, 1953. Figures for salmon were down sharply, but it must be remembered that net fishing ceased during the fourth week of the month pending a settlement of price agreements between union and operators.

STOCKS

Holdings of all frozen fish in Canada totalled 39,277,000 pounds, consisting of 36,706,000 pounds frozen fresh and 2,571,000 pounds frozen smoked.

EXPORTS

Exports of fish and fish products during the January-May period of 1954 amounted to \$49,533,000 -- 10.0 p.c. higher than in the same five months of 1953.

CANADA

Au Canada (y compris Terre-Neuve), les débarquements de poissons de mer, en juin, se sont établis à 184,331,000 livres d'une valeur initiale de \$9,746,000 au regard de 178,391,000 livres et de \$9,793,000 en juin 1953. C'est une augmentation de 3.3 p. 100 quant au volume, mais une diminution de 0.5 p. 100 quant à la valeur.

Au cours du premier semestre de 1954, le total cumulatif comparé au chiffre correspondant de l'année dernière (entre parenthèses, la différence de pourcentage) s'est établi respectivement à 645,325,000 livres contre 525,263,000 (+ 22.8 p. 100) et à \$28,357,000 contre \$27,144,000 (+ 4.5 p. 100).

ATLANTIQUE

Sur la côte orientale, les débarquements et leur valeur, comparés aussi à ceux de juin 1953 (entre parenthèses, la différence de pourcentage) se sont chiffrés par 170,746,000 livres en comparaison de 160,255,000 (+ 6.5 p. 100) et par \$7,754,000 comparativement à \$7,132,000 (+ 8.7 p. 100).

Durant le semestre observé, la prise a été de 468,479,000 livres au regard de 465,793,000 (+ 0.6 p. 100) et la valeur, de \$22,131,000 contre \$21,859,000 (+ 1.2 p. 100). La baisse des prix unitaires a fait descendre la valeur totale de la pêche de homard; toutefois, cette perte semble avoir été plus que compensée par la prise accrue de poissons de fond.

A Terre-Neuve, les débarquements et leur valeur ont été supérieurs à ceux de 1953 en juin et pendant la période janvier-juin.

Au Nouveau-Brunswick, la pêche de la sardine l'emporte encore sur celle de l'an dernier, mais la valeur cumulative de la prise de homard est descendue de 21.9 p. 100.

En Nouvelle-Ecosse, les débarquements et leur valeur se sont établis à 48,925,000 livres et à \$2,841,000, diminution et augmentation respectives de 6.7 et de 0.1 p. 100 sur juin 1953. Les prix du homard ont apparemment baissé au cours du mois observé.

PACIFIQUE

Sur la côte du Pacifique, la prise (13,585,000 livres) a été évaluée à \$1,992,000, soit, dans les deux cas, une diminution de 25.1 p. 100 par rapport à juin 1953. Les chiffres enregistrés pour la pêche du saumon ont accusé une forte baisse; mais, à ce sujet, il faut se rappeler que la pêche au filet a cessé durant la quatrième semaine du mois, alors qu'on attendait un accord entre l'union et les exploitants sur les prix.

STOCKS

Les stocks de tous les poissons gelés au Canada ont atteint le total de 39,277,000 livres, dont 36,706,000 livres de poisson frais et 2,571,000 livres de poisson fumé.

EXPORTATIONS

Les exportations de poisson et de produits du poisson, durant la période janvier-mai de 1954, ont été évaluées à \$49,533,000, gain de 10.0 p. 100 sur la valeur correspondante de 1953.

CANADIAN FISHERIES - JULY 1954

CANADA

In July the sea-fishermen of Canada (Newfoundland included) caught 343,630,000 pounds of fish worth \$14,460,000 to them, compared to a catch of 337,761,000 pounds valued at \$16,881,000 taken in July 1953. Landings, therefore, were 1.7 p.c. heavier, but 14.3 p.c. lower in value than in the same month of last year.

Landings during the first seven months of 1954 were -- with last year's comparable figures and the percentage differences in parentheses -- 986,590,000 pounds (864,036,000 pounds; plus 14.2 p.c.) and \$42,724,000 (\$44,026,000; minus 3.0 p.c.)

ATLANTIC

East Coast landings and landed values for July were 299,179,000 pounds (281,752,000 pounds; plus 6.2 p.c.) and \$8,628,000 (\$8,138,000; plus 6.0 p.c.).

For the first seven months of this year the catch was 765,293,000 pounds (747,544,000 pounds; plus 2.4 p.c.), whilst the catch value was \$30,667,000 (\$29,998,000; plus 2.2 p.c.). The lobster fishery is still running below last year's level in value, but returns from almost all the other major species are greater.

In Newfoundland landings and landed values were appreciably above last year's figures, both in July and during the seven-month period under review.

The New Brunswick sardine catch continues its marked improvement over last year. The aggregate value of the lobster fishery, \$244,000, is some 3 p.c. lower than in 1953.

Nova Scotia landings and landed values -- 47,045,000 pounds and \$2,080,000 -- were down by 9.9 and 6.1 p.c. respectively from the comparable figures for July of last year. The most notable declines are to be found in the lobster, swordfish and cod fisheries. Landings of rosefish are greater this year.

PACIFIC

The Pacific Coast catch of 44,451,000 pounds worth \$5,832,000 to the fisherman was 20.6 and 33.3 p.c. lower than that taken in July, 1953.

STOCKS

Holdings of all frozen fish in Canada on August 1st amounted to 48,736,000 pounds, consisting of 46,325,000 pounds frozen fresh and 2,411,000 pounds frozen smoked.

EXPORTS

Exports of fish and fish products during the January-June period of 1954 totalled \$60,976,000 -- 9.1 p.c. higher than in the same six months of 1953.

PÊCHERIES CANADIENNES - JUILLET 1954

CANADA

Au Canada (y compris Terre-Neuve), les pêcheurs ont pris en juillet 343,-630,000 livres de poissons de mer d'une valeur de \$14,460,000, au regard de 337,-761,000 livres et de \$16,881,000 en juillet 1953. Les débarquements de juillet ont donc été supérieurs de 1.7 p. 100 à ceux de 1953 et la valeur, inférieure de 14.3 p. 100.

Au cours des sept premiers mois de 1954, les chiffres cumulatifs comparés à ceux de l'année dernière (entre parenthèses, la différence de pourcentage) se sont établis à 986,590,000 livres contre 864,036,000 (+ 14.2 p. 100) et à \$42,724,000 contre \$44,026,000 (-3.0 p. 100).

ATLANTIQUE

Sur la côte orientale, les débarquements et leur valeur ont été respectivement de 299,179,000 livres en comparaison de 281,752,000 (+ 6.2 p. 100) en juillet 1953 et de \$8,128,000 par rapport à \$8,138,000 (+ 6.0 p. 100).

Durant les sept premiers mois de la présente année, la pêche s'est chiffrée par 765,293,000 livres au regard de 747,544,000 (+ 2.4 p. 100) et sa valeur, par \$30,667,000 par rapport à \$29,998,000 (+ 2.2 p. 100). Les recettes de la prise de homard sont demeurées inférieures à celles de l'année précédente, mais le revenu de toutes les autres principales espèces a été plus élevé.

A Terre-Neuve, les débarquements et leur valeur ont largement dépassé ceux de l'année précédente en juillet et durant la période des sept mois.

Au Nouveau-Brunswick, la pêche de la sardine a continué de se développer par rapport à l'année dernière. La valeur cumulative de la prise de homard (\$244,000) est descendue de 3 p. 100 par rapport à 1953.

En Nouvelle-Ecosse, les débarquements et leur valeur (47,045,000 livres et \$2,080,000) sont tombés respectivement de 9.9 et de 6.1 p. 100 au regard de juillet 1953. Les prises de homard, d'espadon et de morue ont accusé les plus fortes diminutions, mais les débarquements de sébaste ont augmenté.

PACIFIQUE

Sur la côte du Pacifique, la prise et sa valeur (44,451,000 livres et \$5,832,000) ont baissé respectivement de 20.6 et de 33.3 p. 100 au regard de juillet 1953.

STOCKS

Les stocks de tous les poissons gelés au Canada, le 1^{er} août, ont atteint le total de 48,736,000 livres, dont 46,325,000 de poisson frais et 2,411,000 de poisson fumé.

EXPORTATIONS

Les exportations de poisson et de produits du poisson, au cours du premier semestre de 1954, ont été évaluées à \$60,976,000, gain de 9.1 p. 100 sur la valeur correspondante de l'année dernière.

CANADIAN FISHERIES - AUGUST 1954

CANADA

During August the sea fisheries of Canada yielded 261,453,000 pounds of fish worth \$13,824,000 as against a catch of 236,962,000 pounds worth \$11,453,000 taken in the same month of last year. Landings, therefore, were 10.3 p.c. heavier and 20.7 p.c. more valuable than in August, 1953.

Landings in the first eight months of 1954 were -- with last year's comparable figures and the percentage differences in brackets -- 1,251,657,000 pounds (1,101,000,000 pounds; plus 13.7 p.c.) and \$56,419,000 (\$55,479,000; plus 1.7 p.c.).

ATLANTIC

Atlantic Coast landings and landed values for August were 206,173,000 pounds (171,994,000 pounds; plus 19.9 p.c.) and \$6,129,000 (\$5,228,000; plus 17.2 p.c.).

During the eight-month period under review the catch amounted to 975,080,000 pounds (919,540,000 pounds; plus 6.0 p.c.) and the value to \$36,666,000 (\$35,226,000; plus 4.1 p.c.).

In Quebec landings and landed values were appreciably lower than those of last year, both for August and the January-August period.

Throughout the Atlantic Provinces the lobster fishery would appear to be somewhat less rewarding to the fisherman this year. However, the cod catch is higher than in 1953, particularly in Newfoundland.

PACIFIC

On our Pacific Coast, where a full week's fishing was lost because of a strike of tendermen, landings during the month were valued at \$7,695,000 -- 23.6 p.c. higher than in August, 1953. The main factor contributing to this substantial increase would appear to be the return of the "Adams River" race of sockeye salmon.

STOCKS

Holdings of frozen fish in Canada at September 1st amounted to 57,302,000 pounds, of which 54,687,000 pounds were frozen fresh and 2,615,000 pounds frozen smoked.

EXPORTS

Exports of fish and fish products during the eight months of 1954 to the end of August attained a value of \$82,642,000 -- 7.6 p.c. higher than in the same period of 1953. Sales of fresh and frozen fillets to the U.S. market are still climbing.

PECHERIES CANADIENNES - AOÛT 1954

CANADA

Durant le mois d'août, les pêcheries maritimes du Canada ont donné 261,453,000 livres de poisson d'une valeur de \$13,824,000, contre 236,962,000 livres d'une valeur de \$11,453,000 le mois correspondant de l'année écoulée. Par conséquent, les débarquements se sont accrus de 10.3 p. 100, et leur valeur de 20.7 p. 100 sur août 1953.

Les débarquements des huit premiers mois de 1954 ont été les suivants: (entre parenthèses les chiffres de l'année dernière et les pourcentages de différence) 1,251,657,000 livres (1,101,000,000 livres; + 13.7 p. 100) et \$56,419,000 (\$55,479,000; + 1.7 p. 100).

ATLANTIQUE

Sur la côte orientale, les débarquements et leur valeur ont été de 206,173,000 livres (171,994,000 livres; + 19.9 p. 100) et \$6,129,000 (5,228,000; + 17.2 p. 100).

Au cours des huit mois observés, la prise s'est élevée à 975,080,000 livres (919,540,000 livres; + 6.0 p. 100) et sa valeur, à \$36,666,000 (\$35,226,000; + 4.1 p. 100).

Dans le Québec, les débarquements et leur valeur ont été sensiblement plus bas par rapport à l'année écoulée, tant en août, que de janvier à août.

Dans les provinces de l'Atlantique, la pêche au homard semble rapporter moins que l'année passée aux pêcheurs. Par contre, la prise de morue dépasse celle de 1953, surtout à Terre-Neuve.

PACIFIQUE

Sur la côte du Pacifique, où une semaine de pêche a été perdue à cause de la grève des transbordeurs, les débarquements durant le mois ont atteint la valeur de \$7,695,000, en augmentation de 23.6 p. 100 sur août 1953. Le principal facteur qui a contribué à cet accroissement est probablement la montaison des saumons sockeye de la race "Adams River".

STOCKS

Les stocks de poisson gelé au Canada, au 1er septembre, s'élevaient à 57,302,000 livres, dont 54,687,000 de poisson frais et 2,615,000 de poisson fumé.

EXPORTATIONS

Les exportations de poisson et de produits de poisson durant les huit mois de 1954 jusqu'à la fin du mois d'août ont atteint la valeur de \$82,642,000, 7.6 p. 100 de plus que durant la même période de 1953. La vente de filets frais et gelés aux Etats-Unis est en hausse constante.

CANADIAN FISHERIES - SEPTEMBER 1954

CANADA

In September landings in the sea fisheries of Canada totalled 182,435,000 lb. worth \$11,348,000, higher by 3% in terms of weight and 47% in value than the landings of 177,030,000 lb. worth \$7,712,000 taken in September, 1953.

During the first nine months of the year landings totalled 1,433 million pounds, 12% more than the 1,278 million pounds for the same period in 1953, while the comparative 1954 value, \$67,756,000, exceeded the 1953 value, \$63,189,000, by 7%.

ATLANTIC

The Atlantic Coast landings and landed values for September, 1954, were 132,956,000 pounds and \$4,723,000, compared with 119,933,000 pounds and \$3,643,000 for the same month of 1953. This amounted to an increase of 11% in weight and of 29% in value.

During the nine-month period under review landings amounted to 1,107 million pounds and were worth \$41,378,000, 7% and 6% higher respectively than the 1953 figures of 1,039 million pounds and \$38,867,000.

In Nova Scotia the value of landings in general continued on a slightly higher level for the first nine months of this year than for the same period of 1953, up 5% in spite of a decrease of 3% in the value of the lobster landings.

The New Brunswick sardine catch, although slightly lower in volume than in the same nine months of last year, was 40% higher in value.

PACIFIC

In British Columbia monetary returns to the fisherman in September amounted to \$6,625,000, the highest total for any September in the recorded history of our Pacific fisheries. The value of salmon landed amounted to \$6,371,000 and as such constituted more than 96% of the total. Sockeye salmon amounted to \$3,553,000, which was 56% of the total landed value for the month.

STOCKS

Holdings of frozen fish at October 1st amounted to 65,884,000 pounds, of which 63,492,000 pounds were frozen fresh and 2,392,000 pounds frozen smoked.

EXPORTS

Exports of fish and fish products during the nine months of 1954 to the end of September were valued at \$95,218,000, which was 10% higher than in the same period of 1953. Sales of fresh and frozen fillets to the U.S. market are still climbing, but it must be noted that fish blocks are included in this category.

PECHERIES CANADIENNES - SEPTEMBRE 1954

CANADA

Les débarquements de poisson de mer au Canada ont donné en septembre 182,435,000 livres d'une valeur de \$11,348,000, soit une augmentation de 3 p. 100 quant au poids et de 47 p. 100 en valeur au regard de 177,030,000 livres d'une valeur de \$7,712,000 pour septembre 1953.

Durant les neuf premiers mois de l'année, les débarquements ont été de 1,433 millions de livres ou 12 p. 100 de plus qu'en 1953 (1,278 millions); d'autres part, la valeur de 1954, \$67,756,000, surpasse de 7 p. 100 celle de 1953, \$63,189,000.

ATLANTIQUE

Sur la côte de l'Atlantique, les débarquements et leur valeur en septembre 1954 ont été de 132,956,000 livres et de \$4,723,000, contre 119,933,000 livres et \$3,643,000 pour le même mois de 1953, soit une augmentation de 11 p. 100 quant au poids et de 29 p. 100 quant à la valeur.

Durant les neuf premiers mois, les débarquements se sont chiffrés par 1,107 millions de livres et \$41,378,000, soit des avances de 7 et de 6 p. 100 sur les chiffres correspondants de 1953, 1,039 millions de livres et \$38,867,000.

En Nouvelle-Ecosse, durant les neuf premiers mois de l'année, la valeur des débarquements en général est demeurée un peu plus élevée qu'en 1953, de 5 p. 100 malgré une baisse de 3 p. 100 pour le homard.

La prise de sardines au Nouveau-Brunswick, bien que d'un volume un peu moindre que l'an dernier, a vu sa valeur augmenter de 40 p. 100.

PACIFIQUE

En Colombie-Britannique, les recettes des pêcheurs en septembre se sont chiffrées par \$6,625,000, soit le plus haut total jamais atteint pour ce mois. La valeur du saumon débarqué a été de \$6,371,000, soit plus de 96 p. 100 du total. La valeur du saumon sockeye a été de \$3,553,000, ou 56 p. 100 de la valeur totale.

STOCKS

Les stocks de poisson congelé le 1er octobre se chiffraient par 65,884,000 livres, dont 63,492,000 livres de poisson frais et 2,392,000 livres de poisson fumé.

EXPORTATIONS

Les exportations de poisson et de produits du poisson durant les neuf premiers mois ont atteint une valeur de \$95,218,000 en 1954, soit 10 p. 100 de plus qu'en 1953. Les ventes de filets frais et congelés aux marchés américains continuent d'augmenter, mais il faut remarquer que les blocs de poisson entrent dans cette catégorie.

"Puerto Rico" should read 14,187 instead of 14,124.

CANADIAN FISHERIES - OCTOBER, 1954

CANADA

October landings in the sea-fisheries of Canada amounted to 179,949,000 lb. worth \$6,629,000, higher by 2% and 23% respectively than the 177,006,000 lb. of fish worth \$5,388,000 taken in October, 1953.

In the first ten months of 1954 landings totalled 1,612 million pounds, 11% more than the 1,455 million pounds landed in the comparable period of 1953, while the 1954 value, \$74,020,000, exceeded the 1953 value, \$68,580,000, by 8%.

ATLANTIC

The Atlantic Coast landings of 67,132,000 lb. for October, 1954, valued at \$2,178,000, were 5% higher in volume and 3% higher in value than the 63,789,000 lb. and \$2,121,000 reported in the same month of last year.

During the ten-month period under review landings amounted to 1,173 million pounds and were valued at \$43,191,000, higher by 6% and 5% respectively than the 1953 figures of 1,103 million pounds and \$40,991,000.

In total, Nova Scotia had a better month than in October, 1953. Rosefish, haddock and cod fisheries showed significant increases. On the other hand hake and cusk, plaice, mackerel and some shellfish showed decreases. For the ten-month period, total landings were higher than in 1953 by 2%, and total value by 3%.

In Quebec, totals both for the month and for the year to date were slightly lower than in 1953, in spite of the increase in the lobster fishery which ran contrary to the general trend.

PACIFIC

In British Columbia landings of 112,817,000 lb. in October were worth \$4,451,000, and were approximately as great as those of the same month last year. However the total value was up by 36%. Salmon landings valued at \$3,397,000 made up 76% of the total for the province, and as such were largely responsible for the increase in value of the landings.

STOCKS

Holdings of frozen fish at November 1st totalled 67,290,000 lb. and consisted of 64,651,000 lb. frozen fresh and 2,639,000 lb. frozen smoked.

EXPORTS

Exports of fish and fish products during the ten months of 1954 to the end of October were valued at \$107,096,000, an amount 12% higher than the comparable figure for 1953. This rise may be attributed chiefly to increased sales of fillets mainly to the U.S.A., and of canned salmon to the United Kingdom.

CANADA

Les débarquements de poisson de mer au Canada ont atteint en octobre 179, - 949,000 livres d'une valeur de \$6,629,000, soit des augmentations respectives de 2 et de 23 p. 100 au regard des chiffres d'octobre 1953 (177,006,000 livres et \$5, - 388,000).

Durant les dix premiers mois de 1954, les débarquements se sont chiffrés par 1,612 millions de livres ou par 11 p. 100 de plus que durant la période correspondante de l'an dernier, 1,455 millions de livres; jusqu'ici, cette année, la valeur (\$74,020,000), surpasse de 8 p. 100 celle (\$68,580,000) de l'an dernier.

ATLANTIQUE

Sur la côte de l'Atlantique, les débarquements (67,132,000 livres) en octobre 1954 ont atteint une valeur de \$2,178,000, augmentation de 5 p. 100 en volume et de 3 p. 100 en valeur au regard du mois correspondant de l'an dernier (63,789,000 livres et \$2,121,000).

Durant les dix mois observés ici, les débarquements se sont chiffrés par 1,173,000 livres et ont atteint une valeur de \$43,191,000, avances respectives de 6 et de 5 p. 100 sur les chiffres de 1953, 1,103,000 livres et \$40,991,000.

Dans l'ensemble, la Nouvelle-Ecosse a connu un meilleur mois qu'en octobre 1953. Les pêches de sébaste, d'aiglefin et de morue ont accusé d'importantes augmentations. D'autre part, la prise de merluche et brosmius, de carrelet, de maquereau et de quelques mollusques a accusé des reculs. Durant les dix mois, les débarquements globaux ont augmenté de 2 p. 100 par rapport à ceux des mêmes mois de 1953, et leur valeur, de 3 p. 100.

Dans le Québec, le total du mois et celui des mois écoulés jusqu'ici ont été inférieurs à ceux de 1953, malgré une augmentation de la prise de homard, laquelle a différé de la tendance générale.

PACIFIQUE

En Colombie-Britannique, les débarquements d'octobre, 112,817,000 livres, ont atteint une valeur de \$4,451,000 et ont été à peu près aussi importants que ceux du même mois l'an dernier. Cependant, la valeur totale a augmenté de 36 p. 100. La valeur du saumon, \$3,397,000, forme 76 p. 100 du total provincial et à ce titre, a été en grande partie comptable de l'augmentation de la valeur des débarquements.

STOCKS

Les stocks de poisson congelé se chiffraient le 1^{er} novembre par 67,290,000 et comprenaient 64,651,000 livres de poisson frais congelé et 2,639,000 livres de poisson fumé.

EXPORTATIONS

Durant les dix mois terminés à la fin d'octobre, les exportations de poisson et produits ont atteint une valeur de \$107,096,000, chiffre supérieur de 12 p. 100 à celui de 1953. Cette augmentation est surtout attribuable à l'avance des ventes de filets, particulièrement aux Etats-Unis, et de saumon en boîtes au Royaume-Uni.

CANADIAN FISHERIES - NOVEMBER, 1954

CANADA

November landings in the sea-fisheries of Canada totalled 139,026,000 lb., worth \$3,770,000, lower by 13% in volume and 1% in value than the 159,386,000 lb. worth \$3,802,000 reported in November, 1953.

In the first eleven months of 1954 landings amounted to 1,751 million pounds, 8% over the 1,615 million pounds landed in the same period of 1953, whilst the 1954 value, \$77,817,000, exceeded that of 1953, (\$72,825,000), by 7%.

ATLANTIC

The Atlantic Coast landings in November, 60,789,000 lb. valued at \$2,049,000, were higher by 18% and 3% respectively than the 51,508,000 lb. worth \$1,983,000 reported in November, 1953.

During the January-November period, landings totalled 1,234 million pounds and were valued at \$4,267,000, higher by 7% in volume and 5% in value than the comparable 1953 figures of 1,154 million pounds and \$42,974,000.

Although the November landings in New Brunswick were larger than in the same month of 1953, their value was lower by some 5%. However, in the eleven-month period under review, cumulative landings of 196,732,000 lb. and cumulative value, \$6,721,000, were higher than in 1953 by 7% and 3% respectively.

Nova Scotian fishermen experienced a better month than in November, 1953, with most of the major fisheries showing increases; exceptions were lobster, plaice, hake and cusk. For the January-November period both total landings and total value were higher by 3% than in 1953.

PACIFIC

In November landings in British Columbia totalled 78,237,000 lb. and were valued at \$1,721,000. They were, therefore, 28% and 5% lower than the 107,878,000 lb. of fish worth \$1,819,000 landed in November, 1953.

The herring fishery contributed \$848,000, or approximately 50%, and the salmon fishery \$760,000, or 44%, to the total value. Landings of chum salmon amounted to 8,288,000 lb., worth \$725,000.

STOCKS

Holdings of frozen fish at December 1st amounted to 63,524,000 lb., of which 60,895,000 lb. were frozen fresh and 2,629,000 lb. frozen smoked.

EXPORTS

Exports of fish and fish products during the eleven months of 1954 were valued at \$122,208,000 and thus were 16% above last year's level. Increased exports were reported in all categories, except pickled fish and shellfish, both of which were slightly below last year's figures.

(1) Figures for cod, haddock, pollock, hake, catfish and halibut represent weights in "gutted, head on" state. All other species shown in "round" weight.

(2) Includes a small quantity of haddock, hake and pollock

(3) In Newfoundland scallops are reported in "un-shucked weight" whereas in the other Atlantic Provinces they are reported "shucked".

PECHERIES DU CANADA - NOVEMBRE 1954

CANADA

Les débarquements de poisson de mer au Canada ont été de 139,026,000 livres d'une valeur de \$3,770,000, diminution de 13 p. 100 en volume et de 1 p. 100 en valeur sur les 159,386,000 livres d'une valeur de \$3,802,000 déclarées en novembre 1953.

Au cours des onze premiers mois de 1954, les débarquements se sont chiffrés par 1,751 millions de livres, augmentation de 8 p. 100 sur les 1,615 millions de livres débarquées durant la même période de 1953; d'autre part, la valeur (\$77,817,000) de 1954 surpasse de 7 p. 100 celle de 1953 (\$72,825,000).

ATLANTIQUE

Les débarquements sur la côte de l'Atlantique en novembre (60,789,000 livres) ont atteint une valeur de \$2,049,000, augmentations de 18 et de 3 p. 100 sur les 51,508,000 livres d'une valeur de \$1,983,000 déclarées en 1953.

Durant la période janvier-novembre, les débarquements se sont chiffrés par 1,234 millions de livres d'une valeur de \$4,267,000, augmentation de 7 p. 100 en volume et de 5 p. 100 en valeur sur les chiffres correspondants de 1953 (1,154 millions de livres et \$4,297,000).

Bien que les débarquements de novembre au Nouveau-Brunswick aient été supérieurs à ceux du même mois de 1953, leur valeur a diminué d'environ 5 p. 100. Cependant, pour les onze mois à l'étude, les débarquements (196,732,000 livres) et leur valeur (\$6,721,000) surpassent respectivement de 7 et de 3 p. 100 les chiffres de 1953.

Les pêcheurs de la Nouvelle-Ecosse ont fait de meilleures pêches qu'en novembre 1953, car il y a eu augmentation de la prise de la plupart des espèces; ont fait exception, le homard, le carrelet, la merluche et le brosmius. Durant la période janvier-novembre, les débarquements et la valeur ont dépassé de 3 p. 100 les chiffres de 1953.

PACIFIQUE

En Colombie-Britannique, les débarquements se sont chiffrés par 78,237,000 livres d'une valeur de \$1,721,000. Ils ont en conséquence été inférieur de 28 p. 100 en volume et de 5 p. 100 en valeur à ce qu'ils avaient été en novembre 1953 (107,878,000 livres et \$1,819,000).

La prise de hareng a représenté \$848,000 ou environ 50 p. 100 du total; celle de saumon, \$760,000 ou 44 p. 100. Les débarquements de bécard se sont chiffrés par 8,288,000 livres d'une valeur de \$725,000.

STOCKS

Les stocks de poisson congelé le 1er décembre s'établissaient à 63,524,000 livres, dont 60,895,000 de poisson frais congelé et 2,629,000 de poisson fumé

EXPORTATIONS

Les exportations de poisson et de produits du poisson durant les onze premiers mois de 1954 ont atteint une valeur de \$122,208,000, surpassant ainsi de 16 p. 100 leur niveau de l'an dernier. Il y a eu augmentation de toutes les catégories, à l'exception du poisson mariné et des crustacés, dont les exportations ont légèrement diminué au regard de l'an dernier.

CANADIAN FISHERIES - DECEMBER 1954

CANADA

In December landings in the sea-fisheries of Canada amounted to 119,050,000 lb. and were worth \$4,321,000 -- higher by just 1% in volume and by 6% in value than the 117,489,000 lb. worth \$4,081,000 caught in December, 1953.

The catch during the year 1954 -- 1,900,512,000 lb. valued at \$82,762,000 -- was 10 and 8% higher respectively than the 1,733,743,000 lb. worth \$76,347,000 taken in the previous year.

ATLANTIC

Atlantic Coast landings in December -- 43,520,000 lb. worth \$3,273,000 -- exceeded the December, 1953, figures of 36,728,000 lb. and \$2,980,000 by 18 and 10% respectively.

During the year the catch in our eastern waters totalled 1,307,872,000 lb. and was valued at \$49,164,000, so that increases of 10 and 8% were registered over the comparable 1953 figures of 1,191,222,000 lb. and \$45,395,000.

In Newfoundland landings of cod, haddock and lobster were higher, those of rosefish appreciably lower than in 1953.

Of the major species caught in New Brunswick, lobster and the other shellfish were below the 1953 level. However, increases in the other fisheries were sufficient to raise the volume to 198,907,000 lb. and the value to \$6,904,000 -- 7 and 4% higher than in the previous year.

Nova Scotian fishermen seem to have had only a slightly better year, landings of 333,646,000 lb. and landed value, \$22,193,000, both being approximately 4% higher than in 1953. The lobster fishery, however, ran contrary to the general trend towards higher value.

The 1954 Prince Edward Island catch, 32,834,000 lb., was 4% higher, but the total value, \$2,781,000, was fractionally lower, the main adverse factor being the decline in the lobster haul.

Quebec landings during the year -- 79,407,000 lb. valued at \$2,374,000 -- were 22 and 5% lower respectively than the 102,147,000 lb. worth \$2,496,000 taken in 1953. However, the lobster catch was 5% bigger and more valuable than in 1953.

PACIFIC

December landings in British Columbia amounted to 75,530,000 lb. and were worth \$1,048,000 to the fisherman. Thus they were 6 and 5% lower than the 80,761,000 lb. worth \$1,101,000 caught in December, 1953.

The figures for the whole year, however, reveal a brighter picture. The total catch -- 592,640,000 lb. valued at \$33,598,000 -- exceeded the 1953 figures of 542,521,000 lb. and \$30,952,000 by 9% in both instances. Aggregate salmon landings were 7% more valuable this year.

STOCKS

Holdings of frozen fish at the end of December amounted to 51,939,000 lb., of which 49,418,000 lb. were frozen fresh and 2,521,000 frozen smoked.

EXPORTS

During the year just ended \$132,740,000 worth of Canadian fish and fish products were exported. Increased sales of B. C. canned salmon to the United Kingdom, of frozen blocks, slabs and fillets, and fish meal to the U. S., and of salt cod to the traditional Caribbean and South American markets, all contributed to the total increase of 16% over the figure for 1953.

- (1) Figures for cod, haddock, pollock, hake, catfish and halibut represent weights in "gutted, head on" state. All other species shown in "round" weight.
- (2) Includes a small quantity of haddock, hake and pollock used for salting.
- (3) In Newfoundland scallops are reported in "un-shucked" weight, whereas in the other Atlantic Provinces they are reported "shucked".

CANADA

En décembre 1954, les débarquements de poissons de mer au Canada ont atteint 119,050,000 livres et ont été évalués à \$4,321,000, soit un volume supérieur de 1 p. 100 et une valeur plus élevée de 6 p. 100, par rapport aux chiffres correspondants (117,489,000 et \$4,081,000) de 1953.

Au cours de l'année 1954, la prise et sa valeur (1,900,512,000 livres et \$82,762,000) ont été respectivement supérieures de 10 et de 8 p. 100 à celles (1,733,743,000 livres et \$76,347,000) de l'année précédente.

ATLANTIQUE

Les débarquements sur la côte de l'Atlantique, en décembre, se sont chiffrés par 43,520,000 livres et ont été estimés à \$3,273,000; le volume et la valeur l'emportaient donc de 18 et de 10 p. 100 sur les 36,728,000 livres et \$2,980,000 de décembre 1953.

Durant l'année, la prise dans la même région a atteint un total de 1,307,872,000 livres, d'une valeur de \$49,164,000, soit 10 et 8 p. 100 de plus que celles (1,191,222,000 et \$45,395,000) de l'année précédente.

A Terre-Neuve, les débarquements de morue, églefin et homard se sont accrus par rapport à 1953, mais ceux de chèvre ont décru sensiblement.

Le homard et les autres mollusques, qui comptent au nombre des principales espèces pêchées au Nouveau-Brunswick, ont été prises en plus petite quantité qu'en 1953. Toutefois, la pêche des autres espèces a suffisamment augmenté pour porter le volume total à 198,907,000 livres et la valeur globale à \$6,904,000, soit 7 et 4 p. 100 de plus que l'année précédente.

La Nouvelle-Ecosse a vu la situation de la pêche s'améliorer légèrement en 1954 par rapport à 1953. Les débarquements y ayant été de 383,646,000 livres et leur valeur, de \$22,193,000, les pêcheurs ont ainsi enregistré un gain de 4 p. 100 aux deux points de vue. Cependant, la pêche du homard a subi une perte.

La pêche en Ile-du-Prince-Edouard (32,834,000 livres) s'est élevée de 4 p. 100 en 1954 et sa valeur (\$2,781,000) a quelque peu baissé, par suite, surtout, de la prise réduite du homard.

Au Québec, les débarquements et leur valeur ont toutes deux diminué durant l'année. Les débarquements ont été réduits de 22 p. 100, soit 79,407,000 livres contre 102,147,000, et la valeur, de 5 p. 100, soit \$2,374,000 contre \$2,496,000. Néanmoins, la prise de homard s'est accrue de 5 p. 100 et sa valeur a également monté.

PACIFIQUE

En Colombie-Britannique, les débarquements de décembre 1954 se sont établis à 75,530,000 livres et ont été évalués à \$1,048,000, augmentation respective de 6 et de 5 p. 100 sur les 80,761,000 livres et les \$1,101,000 de décembre 1953.

L'analyse des chiffres annuels, cependant, donne une meilleure perspective. La prise totale, - 592,640,000 livres estimées à \$33,598,000, - a surpassé, relativement au volume et à la valeur, celle (542,521,000 livres et \$30,952,000) de 1953. La valeur totale des débarquements de saumon s'est élevée de 7 p. 100 l'an dernier.

STOCKS

Les stocks de poisson gelé, à la fin de décembre, se chiffraient par 51,939,000 livres, dont 49,419,000 livres de poisson frais et 2,521,000 livres de poisson fumé.

EXPORTATIONS

Au cours de l'année qui vient de se terminer, le Canada a exporté du poisson et des produits pour la somme de \$132,740,000. Les ventes accrues de saumon en conserve de la Colombie-Britannique, ainsi que l'exportation accrue de blocs et filets gelés au Royaume-Uni, de farine de poisson aux Etats-Unis et de morue salée aux marchés traditionnels des Caraïbes et de l'Amérique du Sud, ont contribué à élever de 16 p. 100 les chiffres des exportations.

FISHERIES OF CANADA - JANUARY 1955

CANADA

In January the sea-fishermen of Canada landed 132,058,000 lb. of fish valued at \$3,226,000, these figures being 44 and 26% greater respectively than the 91,698,000 lb. worth \$2,554,000 taken in January, 1954.

ATLANTIC

Landings on the Atlantic Coast in January -- 33,042,000 lb. of fish worth \$1,882,000 -- exceeded the previous year's comparable totals of 31,163,000 lb. and \$1,740,000 by 6 and 8% respectively.

Newfoundland fishermen landed 14,712,000 lb. of fish valued at \$254,000 -- 28 and 20% higher respectively than the 11,463,000 lb. worth \$211,000 reported in January of last year. Substantial increases were recorded in the herring and haddock fisheries.

The January landings in Nova Scotia were down to 15,367,000 lb. worth \$1,341,000 from the comparable 1954 figures of 17,881,000 lb. and \$1,356,000. Of the major fisheries only haddock, lobster and plaice registered increases this year.

In New Brunswick the catch of 2,729,000 lb. was valued at \$259,000 and thus was 75% greater both in volume and value than the 1,562,000 lb. worth \$148,000 taken in January, 1954. The major part of this big increase may be attributed to the smelt fishery, which was some 72% higher in value to the fisherman this year.

PACIFIC

During January the fishermen of British Columbia landed 99,016,000 lb. of fish valued at \$1,344,000. These figures were 64 and 65% greater respectively than the comparable figures of 60,535,000 lb. and \$814,000 for 1954.

The main factor contributing to this rise was to be found in the herring fishery, where landings of 96,367,000 lb. were reported as against 59,095,000 lb. in January, 1954.

Landings of spring salmon and of shellfish were higher than a year ago, but the catch of other species was approximately the same.

STOCKS

At the end of January, 1955, stocks of frozen fish in Canada amounted to 46,289,000 lb., of which 44,061,000 lb. were frozen fresh and 2,228,000 lb. frozen smoked.

EXPORTS

During January exports of fish and fish products amounted to \$10,336,000, and were 23% higher than the \$8,472,000 reported in the same month of 1954.

LA PECHE AU CANADA - JANVIER 1955

CANADA

En janvier, les pêcheurs du Canada ont débarqué 132,058,000 livres de poisson d'une valeur de \$3,226,000; ces chiffres surpassent respectivement de 44 et de 26 p. 100 les chiffres correspondants de janvier l'an dernier, 91,698,000 livres et \$2,554,000.

ATLANTIQUE

Sur la côte de l'Atlantique en janvier, les chiffres des débarquements et de leur valeur, - 33,042,000 livres et \$1,882,000, - surpassent respectivement de 6 et de 8 p. 100 ceux de l'an dernier, - 31,163,000 livres et \$1,740,000.

Les pêcheurs de Terre-Neuve ont débarqué 14,712,000 livres de poisson d'une valeur de \$254,000, - augmentations respectives de 28 et de 20 p. 100 sur les 11,463,000 livres d'une valeur de \$211,000 déclarées en janvier l'an dernier. Des avances sensibles des prises de hareng et d'aiglefin ont été enregistrées.

En Nouvelle-Ecosse, les débarquements de janvier sont tombés à 15,367,000 livres d'une valeur de \$1,341,000 contre 17,881,000 livres et \$1,356,000 un an plus tôt. Des principales pêches, seules les prises d'aiglefin, de homard et de carrelet ont enregistré des avances cette année.

Au Nouveau-Brunswick, la prise de 2,729,000 livres a été évaluée à \$259,000, augmentation de 75 p. 100 et de la prise et de la valeur sur les 1,562,000 livres d'une valeur de \$148,000 prises en janvier 1954. La plus grande partie de cette forte augmentation est attribuable aux prises d'éperlan, lesquelles ont rapporté 72 p. 100 de plus aux pêcheurs durant l'année.

PACIFIQUE

En janvier, les pêcheurs de la Colombie-Britannique ont débarqué 99,016,000 livres de poisson d'une valeur de \$1,344,000. Ces chiffres représentent des augmentations respectives de 64 et de 65 p. 100 sur les chiffres correspondants de l'an dernier, 60,535,000 livres et \$814,000.

Le principal facteur contribuant à cette avance devait être la prise de hareng; 96,367,000 livres ont été déclarées contre 59,095,000 en janvier 1954.

Les débarquements de saumon de printemps et de crustacés ont dépassé ceux d'un an plus tôt, mais la prise de toutes les autres espèces est demeurée à peu près la même.

STOCKS

A la fin de janvier 1955, les stocks de poisson congelé au Canada se chiffraient par 46,289,000 livres dont 44,061,000 livres de poisson frais et 2,228,000 livres de poisson fumé.

EXPORTATIONS

En janvier, les exportations de poisson et produits ont atteint une valeur de \$10,336,000, surpassant ainsi de 22 p. 100 celles du même mois de l'an dernier, \$8,472,000.

OTHER SHELLFISH	- crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - FEBRUARY 1955

CANADA

In February the sea-fishermen of Canada landed 56,709,000 lb. of fish valued at \$1,889,000. The catch reported in the same month of last year amounted to 58,584,000 lb. and was worth \$1,722,000. Therefore, while current landings were 3% lower, their value was 10% higher.

ATLANTIC

Landings on the Atlantic Coast during February -- 33,106,000 lb. of fish worth \$1,439,000 -- exceeded the previous year's comparable totals of 29,643,000 lb. and \$1,265,000 by 12% and 14% respectively.

The fishermen of Newfoundland landed 10,749,000 lb. of fish valued at \$299,000 -- 1% lower in volume, but 12% higher in value than the catch of 10,851,000 lb. worth \$266,000 reported in February, 1954. The most substantial increase occurred in the haddock fishery.

Compared with February, 1954, landings in Nova Scotia increased by 13% to 18,327,000 lb. from 16,234,000 lb., and by 3% to \$861,000 from \$837,000. Of the major species haddock alone registered an increase this year.

In New Brunswick the catch of 3,160,000 lb. was valued at \$215,000, as against a catch of 2,337,000 lb. worth \$143,000 taken in February, 1954. Again the greater portion of this increase is to be found in the smelt fishery.

PACIFIC

During February British Columbia's fishermen landed 23,603,000 lb. of fish worth \$450,000, lower by 18% in volume and 2% in value than the 28,941,000 lb. worth \$457,000 recorded in the same month of last year.

Sole landings of 487,000 lb. were substantially higher than the 237,000 lb. taken in February, 1954.

The herring season was closed on February 9th, several weeks earlier than usual, in order to conserve stocks for spawning purposes.

STOCKS

At the end of February, 1955, stocks of frozen fish in Canada amounted to 33,822,000 lb., of which 31,474,000 lb. were frozen fresh and 2,348,000 lb. frozen smoked.

EXPORTS

In the first two months of the year fish and fish products to the value of \$19,043,000 were exported -- 7% more than the \$17,757,000 reported in the same period of 1954.

LA PECHE AU CANADA - FEVRIER 1955

CANADA

En février, les pêcheurs du Canada ont débarqué 56,709,000 livres de poisson de mer, d'une valeur de \$1,889,000. La prise déclarée au même mois, l'an dernier, s'établissait à 58,584,000 livres, évaluées à \$1,722,000. Les débarquements ont donc été réduits de 3 p. 100, pendant que leur valeur s'accroissait de 10 p. 100.

ATLANTIQUE

Sur la côte de l'Atlantique, en février, les débarquements et leur valeur, - 33,106,000 livres et \$1,439,000, - surpassaient respectivement de 12 et de 14 p. 100 les chiffres correspondants de l'an dernier, 29,643,000 livres et \$1,265,000.

Les pêcheurs de Terre-Neuve ont débarqué 10,749,000 livres de poissons d'une valeur de \$299,000, réduction de 1 p. 100 quant au volume et accroissement de 12 p. 100 quant à la valeur, par rapport à la prise (10,851,000) de février 1954 et à sa valeur (\$266,000). La pêche de l'églefin a enregistré la plus forte augmentation.

Comparativement à février 1954, les débarquements de la Nouvelle-Ecosse se sont accrus de 13 p. 100, soit 18,327,000 livres contre 16,234,000, et leur valeur, de 3 p. 100, soit \$861,000 contre \$837,000. Parmi les principales espèces, l'églefin était seul comptable d'une augmentation, cette année.

Au Nouveau-Brunswick, la prise (3,160,000 livres) a été évaluée à \$215,000, en comparaison de 2,337,000 livres et de \$143,000 en février 1954. La plus grande partie de l'augmentation est survenue de nouveau dans la pêche de l'éperlan.

PACIFIQUE

En février, les pêcheurs de la Colombie-Britannique ont débarqué 23,603,000 livres de poisson, d'une valeur de \$450,000, réduction de 18 p. 100 du volume et de 2 p. 100 de la valeur sur les 28,941,000 livres et les \$457,000 enregistrés le mois correspondant de l'an dernier.

Les débarquements de sole (487,000 livres) ont été fortement supérieurs à ceux (237,000) de février 1954.

La saison du hareng s'est terminée le 9 février, plusieurs semaines plus tôt que d'habitude, afin de conserver les approvisionnements pour le frai.

STOCKS

A la fin de février 1955, les stocks de poisson gelé au Canada se chiffraient par 33,822,000 livres, dont 31,474,000 de poisson frais et 2,348,000 de poisson fumé.

EXPORTATIONS

Au cours des deux premiers mois de la présente année, le Canada a exporté du poisson et des produits du poisson pour la valeur de \$19,043,000, hausse de 7 p. 100 sur les \$17,757,000 de la période correspondante de 1954.

OTHER ESTUARIAL	- eel, shad, sea-bass or -perch, sturgeon, tomcod	- eulachon, sea-bass or -perch smelt, sturgeon
OTHER SHELLFISH	- crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - MARCH 1955

CANADA

In March the sea-fisheries of Canada yielded 46,622,000 lb. of fish worth \$1,882,000 compared to landings of 96,485,000 lb. valued at \$2,636,000 reported in the same month of 1954.

During the first quarter of 1955 landings totalled 236,626,000 lb. and were worth \$7,027,000. In the same period of last year the comparable totals were 240,369,000 lb. and \$6,895,000.

ATLANTIC

On the Atlantic Coast landings during March were 40,906,000 lb. and were valued at \$1,626,000 as against the totals of 34,687,000 lb. and \$1,637,000 reported in March 1954.

Newfoundland fishermen landed 14,265,000 lb., an increase of 20% over the 11,901,000 lb. taken in the same month of last year. The total landed value, \$394,000, was 33% higher than the value of \$297,000, placed upon the March 1954 catch. The haddock fishery continues on the same high level that was noted in previous months.

In Nova Scotia landings of 24,410,000 lb. were 17% higher than the 20,837,000 lb. reported in March 1954. However, the total landed value, \$1,172,000 was 8% lower than the \$1,281,000 shown for last year, the increase in haddock not being enough to counteract the decrease in the lobster fishery.

New Brunswick landings were lower this month, 1,318,000 lb. worth \$48,000 compared to 1,780,000 lb. worth \$56,000 in March 1954. The sardine fishery seems to have got off to a slower start this year.

PACIFIC

Landings of fish in British Columbia amounted to only 5,716,000 lb. in March as against 61,798,000 lb. in 1954, and were worth only \$256,000 compared to returns of almost a million dollars in the same month of last year. Herring seining operations were stopped early in February, and the only herring landed in March were those taken for bait.

Shellfish landings are greater this year, the total value for the first quarter being \$315,000 as against \$214,000 in the same period of 1954.

STOCKS

At the end of March stocks of frozen fish in Canada amounted to 23,037,000 lb., of which 20,879,000 lb. were frozen fresh and 2,158,000 lb. frozen smoked.

EXPORTS

During the first three months of 1955 Canada exported \$29,221,000 worth of fish and fish products -- \$473,000 or approximately 2% more than the \$28,748,000 reported in the same quarter of 1954.

LA PECHE AU CANADA - MARS 1955

CANADA

En mars, les pêches du Canada ont donné 46,622,000 livres de poisson d'une valeur de \$1,882,000 en comparaison de débarquements de 96,485,000 livres d'une valeur de \$2,636,000 durant le même mois de 1954.

Durant le premier trimestre de 1955, les débarquements se sont chiffrés par 236,626,000 livres d'une valeur de \$7,027,000. Les chiffres de la période correspondante de l'an dernier étaient 240,369,000 livres et \$6,895,000.

ATLANTIQUE

Sur la côte de l'Atlantique en mars, les débarquements se sont chiffrés par 40,906,000 livres d'une valeur de \$1,626,000 contre 34,687,000 livres d'une valeur de \$1,637,000 en mars 1954.

Les pêcheurs de Terre-Neuve ont débarqué 14,265,000 livres de poisson, augmentation de 20 p. 100 sur les 11,901,000 débarquées durant le même mois de l'an dernier. La valeur totale des débarquements, \$394,000, a surpassé de 33 p. 100 celle de la prise de mars 1954, (\$297,000). La pêche de l'aiglefin s'est poursuivie au même haut niveau que durant les mois précédents.

En Nouvelle-Ecosse, des débarquements de 24,410,000 livres ont représenté une avance de 17 p. 100 sur les 20,837,000 livres déclarées en mars 1954. Toutefois, le total de la valeur débarquée, \$1,172,000 a été inférieur de 8 p. 100 au total correspondant de l'an dernier (\$1,281,000), la prise d'aiglefin n'ayant pu compenser la baisse des pêches de homard.

Les débarquements du Nouveau-Brunswick ont diminué durant le mois pour s'établir à 1,318,000 livres d'une valeur de \$48,000 contre 1,780,000 livres d'une valeur de \$56,000 en mars 1954. Les pêches de sardine semblent débiter plus lentement cette année.

PACIFIQUE

Les débarquements de poisson en Colombie-Britannique ne se sont chiffrés que par 5,716,000 livres en mars contre 61,798,000 en 1954 et leur valeur n'a été que de \$256,000 contre une valeur de près d'un million de dollars le même mois l'an dernier. La prise du hareng à la seine a cessé tôt en février et le seul hareng débarqué en mars a été celui pris comme appât.

Les débarquements de crustacés ont augmenté cette année; la valeur totale de la prise du premier trimestre a été de \$315,000 contre \$214,000 durant la même période l'an dernier.

STOCKS

A la fin de mars, les stocks de poisson congelé au Canada s'établissaient à 23,037,000 livres, dont 20,879,000 livres de poisson frais et 2,158,000 livres de poisson fumé.

EXPORTATIONS

Durant les trois premiers mois de 1955, le Canada a exporté pour \$29,221,000 de poisson et produits, soit une augmentation de \$473,000 ou d'environ 2 p. 100 sur la valeur correspondante de 1954 (\$28,748,000).

FISHERIES OF CANADA - APRIL 1955

CANADA

In April the sea-fisheries of Canada yielded 83,229,000 lb. of fish worth \$3,894,000 compared to landings of 72,491,000 lb. valued at \$3,501,000 in the same month of 1954.

During the first four months of this year landings totalled 321,731,000 lb. and were worth \$10,960,000. In the same period of last year the comparable totals were 312,457,000 lb. and \$10,413,000.

ATLANTIC

On the Atlantic Coast the April catch amounted to 79,356,000 lb. and was valued at \$3,494,000 as against the totals of 68,510,000 lb. and \$3,126,000 reported in April, 1954.

In Newfoundland the fishermen landed 20,162,000 lb., an amount slightly below the 20,209,000 lb. taken in April, 1954. The value, \$572,000, was, however, some 8% higher than the \$530,000 reported a year ago.

Nova Scotia landings, 34,668,000 lb. worth \$2,720,000, were 19 and 13% higher respectively than the comparable 1954 figures of 29,079,000 lb. and \$2,415,000. Returns from the lobster fishery improved in April, but the biggest gain continues to be shown by the haddock catch.

PACIFIC

Landings of fish in British Columbia amounted to 3,873,000 lb. in April as against 3,981,000 lb. in 1954, but were worth \$400,000, 7% higher than the \$375,000 reported in the same month of last year. The crab catch almost doubled in value to \$55,000 from \$30,000 in April, 1954.

STOCKS

At the end of April stocks of frozen fish in Canada amounted to 24,449,000 lb., of which 21,879,000 lb. were frozen fresh and 2,570,000 lb. frozen smoked. Total holdings were higher by 668,000 lb. fresh and by 402,000 lb. (19%) smoked than those at the beginning of the month.

EXPORTS

During the first four months of 1955 Canada exported \$37,102,000 worth of fish and fish products -- \$2,388,000 or approximately 6% less than the \$39,490,000 marketed abroad in the same period of last year. Sales of blocks and slabs are still on the up-grade, but exports of canned salmon are down by almost 50%.

LA PECHE AU CANADA, AVRIL 1955

CANADA

En avril, les pêches maritimes du Canada ont donné 83,229,000 livres de poisson d'une valeur de \$3,894,000 contre 72,491,000 livres d'une valeur de \$3,501,000 durant le même mois de 1954.

Durant les quatre premiers mois de l'année, les débarquements se sont chiffrés par 321,731,000 livres d'une valeur de \$10,960,000. Durant la même période de l'an dernier, les chiffres comparatifs étaient 312,457,000 livres et \$10,413,000.

ATLANTIQUE

Sur la côte de l'Atlantique en avril, la prise a été de 79,356,000 livres d'une valeur de \$3,494,000 contre 68,510,000 livres et \$3,126,000 en avril 1954.

A Terre-Neuve, les pêcheurs ont débarqué 20,162,000 livres, quantité légèrement inférieure aux 20,209,000 livres prises en avril 1954. Leur valeur, \$572,000, a cependant surpassé de 8 p. 100 celle d'un an auparavant, \$530,000.

En Nouvelle-Ecosse, des débarquements de 34,668,000 livres d'une valeur de \$2,720,000 ont représenté des avances respectives de 19 et de 13 p. 100 sur les chiffres comparatifs de l'an dernier, 29,079,000 livres et \$2,415,000. La prise de homard a augmenté en avril, mais le gain le plus fort demeure la prise d'églefin.

PACIFIQUE

Les débarquements de poisson en Colombie-Britannique se sont chiffrés par 3,873,000 livres en avril contre 3,981,000 livres en 1954, mais leur valeur, \$400,000, a surpassé de 7 p. 100 celle du même mois l'an dernier, \$375,000. La valeur de la prise de crabe a presque doublé, passant de \$30,000 en avril 1954 à \$55,000 cette année.

STOCKS

A la fin d'avril, les stocks de poisson congelé du pays se chiffraient par 24,449,000 livres, dont 21,879,000 livres de poisson frais et 2,570,000 livres de poisson fumé. L'ensemble des stocks représentait une augmentation de 668,000 livres pour le poisson frais et de 402,000 livres (19 p. 100) pour le poisson fumé, au regard des stocks du début du mois.

EXPORTATIONS

Durant les quatre premiers mois de 1955, le Canada a exporté pour \$37,102,000 de poisson et produits - diminution de \$2,388,000 ou d'environ 6 p. 100 sur le total correspondant de l'an dernier, \$39,490,000. Les ventes de blocs et de bains de poisson sont encore très hautes, mais les exportations de saumon en conserve ont diminué de près de 50 p. 100.

OTHER SHELLFISH	- crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - MAY 1955

CANADA

In May the sea-fishermen of Canada landed 163,816,000 lb. of fish worth \$9,113,000, compared to a catch of 151,674,000 lb. worth \$9,052,000 taken in May, 1954.

Landings in the first five months of this year totalled 482,017,000 lb. and were valued at \$20,068,000. In the same period of last year the comparable totals were 461,713,000 lb. and \$19,456,000.

ATLANTIC

On the Atlantic Coast the May catch amounted to 150,716,000 lb. -- 11% greater than the 136,314,000 lb. recorded in May, 1954 -- and was valued at \$7,512,000 -- 6% higher than the \$7,044,000 shown for the same month of last year.

In Newfoundland fishermen landed 17,885,000 lb., an amount slightly greater than the 17,787,000 lb. taken in May, 1954. The value, \$816,000, was also fractionally higher than the \$713,000 recorded a year ago.

Nova Scotia landings, 48,705,000 lb. worth \$3,956,000, were just under the comparable 1954 figures of 49,328,000 lb. and \$3,983,000.

The aggregate lobster catch to the end of May in our Eastern Provinces was some 7% bigger and 5% more valuable than in the same period of 1954.

PACIFIC

Landings in British Columbia amounted to 13,100,000 lb. as against 15,360,000 lb. in May, 1954, and were worth \$1,601,000, 20% lower than the \$2,008,000 reported last year.

Of the major Pacific species only those in the shellfish category are on a higher level this year.

STOCKS

At the end of May stocks of frozen fish in Canada amounted to 27,369,000 lb., and of this total 24,768,000 lb. were frozen fresh and 2,601,000 lb. frozen smoked. Compared to the 1954 figures, current stocks were lower by 4,719,000 lb. (16%) fresh, but higher by 79,000 lb. (3%) smoked.

EXPORTS

During the first five months of 1955 Canada exported \$46,994,000 worth of fish and fish products -- \$3,008,000 (6%) less than the \$50,002,000 worth marketed abroad in the same period of last year.

LA PÊCHE AU CANADA, MAI 1955

CANADA

En mai, les pêcheurs maritimes du Canada ont débarqué 163,816,000 livres de poisson d'une valeur de \$9,113,000 au regard d'une prise de 151,674,000 livres d'une valeur de \$9,052,000 en mai 1954.

Au cours des cinq premiers mois de l'année, les débarquements ont atteint 482,017,000 livres d'une valeur de \$20,068,000. Durant la même période l'an dernier, les chiffres correspondants étaient de 461,713,000 livres et de \$19,456,000.

ATLANTIQUE

Sur la côte de l'Atlantique, la prise de mai a été de 150,716,000 livres, - augmentation de 11 p. 100 au regard de mai l'an dernier, 136,314,000 livres; sa valeur s'établissait à \$7,512,000, augmentation de 6 p. 100 sur les \$7,044,000 du même mois l'an dernier.

A Terre-Neuve, les pêcheurs ont débarqué 17,885,000 livres de poisson, quantité très légèrement supérieure à celle de mai l'an dernier, 17,787,000. La valeur de ce poisson, \$816,000 a aussi été légèrement supérieure à celle d'un an plus tôt, \$713,000.

Les débarquements de Nouvelle-Ecosse, 48,705,000 livres d'une valeur de \$3,956,000 sont à peine inférieurs à ceux de l'an dernier, 49,328,000 livres d'une valeur de \$3,983,000.

La prise globale de homard à la fin de mai dans les provinces de l'Est a surpassé de 7 p. 100 celle de mai l'an dernier quant à la quantité et de 5 p. 100 quant à la valeur.

PACIFIQUE

En Colombie-Britannique, les débarquements se sont chiffrés par 13,100,000 livres contre 15,360,000 en mai 1954; leur valeur atteignait \$1,601,000 ou 20 p. 100 de moins que les \$2,008,000 déclarés l'an dernier.

Parmi les principales espèces de poisson du Pacifique, seuls les crustacés ont augmenté cette année.

STOCKS

A la fin de mai, les stocks de poisson congelé au Canada s'établissaient à 27,369,000 livres; de ce total, 24,768,000 livres étaient formées de poisson congelé frais et 2,601,000 livres, de poisson fûmé. Au regard des chiffres de 1954, il y a eu diminution de 4,719,000 livres ou de 16 p. 100 du poisson congelé frais, mais augmentation de 79,000 livres ou de 3 p. 100 du poisson fûmé.

EXPORTATIONS

Durant les cinq premiers mois de 1955, le Canada a exporté pour \$46,994,000 de poisson et produits, diminution de \$3,008,000 ou de 6 p. 100 sur la valeur mise en marché durant la même période de l'an dernier, \$50,002,000.

OTHER SHELLFISH - crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - JUNE 1955

CANADA

During June the sea-fisheries of Canada yielded 185,246,000 lb. of fish worth \$9,396,000 -- a catch that was 3% lower in volume and 8% in value than the 190,514,000 lb. worth \$10,195,000 taken in June, 1954.

Landings in the first six months of this year -- 665,752,000 lb. valued at \$29,392,000 -- were only fractionally different from the 652,226,000 lb. worth \$29,652,000 reported in the same period of last year.

ATLANTIC

On the Atlantic Coast the June catch totalled 172,641,000 lb. -- 2% under the 176,929,000 lb. recorded in June, 1954 -- and was valued at \$7,474,000 -- 5% lower than the \$7,894,000 reported for the same month last year.

In Newfoundland fishermen landed 69,907,000 lb. of fish -- 11% lower than the 78,653,000 lb. taken in June, 1954. The value, \$2,123,000, was 7% under the \$2,272,000 shown a year ago.

The Nova Scotia catch -- 57,747,000 lb. worth \$2,958,000 -- was higher by 18 and 4% respectively than the comparable 1954 figures of 48,737,000 lb. and \$2,845,000.

Figures for the first six months of this year would indicate that the value of the lobster and haddock catches in our Eastern Provinces is slightly above the 1954 level.

PACIFIC

In British Columbia the total value of the June catch was \$1,922,000 -- some 16% lower than the June, 1954, landings.

Halibut landings amounted to 5,884,000 lb. and were valued at \$735,000. The salmon catch of 3,203,000 lb. worth \$769,000 was approximately 30% higher in value than in June, 1954.

STOCKS

At the end of June stocks of frozen fish in Canada amounted to 36,869,000 lb., and consisted of 34,196,000 lb. frozen fresh and 2,673,000 lb. frozen smoked. Compared to the end of June, 1954, inventories, current stocks were lower by 2,761,000 lb. (7%) frozen fresh, but higher by 85,000 lb. (3%) smoked.

EXPORTS

During the first six months of 1955 Canada exported \$61,042,000 worth of fish and fish products -- \$67,000 more than the \$60,975,000 worth marketed abroad in the same period of last year.

LA PÊCHE AU CANADA, JUIN 1955

CANADA

En juin, la pêche maritime au Canada a donné 185,246,000 livres de poisson d'une valeur de \$9,396,000. Cette prise a diminué de 3 p. 100 quant au volume et de 8 p. 100 quant à la valeur, au regard de celle (190,514,000 livres et \$10,195,000) de juin 1954.

Au cours du premier semestre de la présente année, les débarquements (665,752,000 livres évaluées à \$29,392,000) n'ont différé que légèrement de ceux (652,226,000 livres et \$29,652,000) de la période correspondante de l'an dernier.

ATLANTIQUE

Sur la côte de l'Atlantique, la prise de juin s'est chiffrée par 172,641,000 livres, diminution de 2 p. 100 par rapport aux 176,929,000 de juin 1954, et sa valeur s'est établie à \$7,474,000, diminution de 5 p. 100 par rapport à \$7,894,000.

Les pêcheurs de Terre-Neuve ont débarqué 69,907,000 livres de poisson, soit 11 p. 100 de moins qu'en juin 1954 (78,653,000). La valeur de cette pêche (\$2,123,000) était inférieure de 7 p. 100 à celle (\$2,272,000) d'une année auparavant.

La prise de la Nouvelle-Ecosse et sa valeur (57,747,000 livres et \$2,958,000) étaient supérieures, respectivement, de 18 et de 4 p. 100 à celles (48,737,000 livres et \$2,845,000) du même mois en 1954.

Les chiffres relatifs au premier semestre de la présente année semblent indiquer que la valeur des prises de homard et d'églefin dans les provinces de l'Est est légèrement plus élevée que celle de 1954.

PACIFIQUE

En Colombie-Britannique, la valeur totale de la prise de juin a été \$1,922,000, soit environ 16 p. 100 de moins qu'au cours de juin 1954.

Les débarquements de flétan se sont établis à 5,884,000 livres et ont évalués à \$735,000. La prise de saumon (3,203,000 livres) a enregistré une valeur de \$769,000, soit environ 30 p. 100 de plus qu'en juin 1954.

STOCKS

A la fin de juin, les stocks de poisson congelé au Canada se sont établis à 36,869,000 livres et comptaient 34,196,000 livres de poisson frais et 2,673,000 livres de poisson fumé. Comparativement à la fin de juin 1954, les stocks de poisson frais congelé avaient diminué de 7 p. 100 ou de 2,761,000 livres, mais ceux de poisson fumé avaient augmenté de 3 p. 100 ou de 85,000 livres.

EXPORTATIONS

Durant le premier semestre de 1955, le Canada a exporté pour \$61,042,000 de poisson et de produits du poisson, soit \$67,000 de plus que les \$60,975,000 de la période correspondante, l'an dernier.

FISHERIES OF CANADA - JULY 1955

CANADA

During July the sea-fisheries of Canada yielded 305,205,000 lb. of fish worth \$12,791,000 -- a catch that was 18% lower in volume and 16% in value than the 371,901,000 lb. worth \$15,255,000 taken in July 1954.

Landings in the first seven months of this year -- 972,902,000 lb. valued at \$42,623,000 -- were lower as compared with the 1,024,126,000 lb. worth \$44,906,000 reported in the same period of last year.

ATLANTIC

On the Atlantic Coast the July catch totalled 278,358,000 lb. -- 15% under the 326,513,000 lb. recorded in July 1954 -- and was valued at \$7,555,000 -- 18% lower than the \$9,230,000 reported for the same month last year.

In Newfoundland fishermen landed 189,525,000 lb. of fish -- 16% lower than the 226,714,000 lb. taken in July 1954. The value, \$4,125,000 was 26% under the \$5,594,000 shown a year ago.

The Nova Scotia catch -- 54,071,000 lb. worth \$2,317,000 -- was higher by 15 and 7% respectively than the comparable 1954 figures of 47,045,000 lb. and \$2,165,000.

PACIFIC

In British Columbia the total of the July catch was \$5,236,000 -- some 13% lower than the July 1954, landings.

Halibut landings amounted to 3,041,000 lb. and were valued at \$438,000. The salmon catch of 19,752,000 lb. worth \$4,223,000 was approximately 15% lower in value than in July 1954.

STOCKS

At the end of July stocks of frozen fish in Canada amounted to 47,328,000 lb. and consisted of 44,542,000 lb. frozen fresh and 2,786,000 lb. frozen smoked. Compared to the end of July 1954, inventories, current stocks were higher by 27,000 lb. frozen fresh. Smoked stocks also showed an increase of 397,000 lb.

EXPORTS

During the first seven months of 1955 Canada exported \$69,065,000 worth of fish and fish products -- \$3,048,000 less than the \$72,113,000 worth marketed abroad in the same period of last year.

LA PÊCHE AU CANADA, JUILLET 1955

CANADA

En juillet, la pêche maritime au Canada a donné 305,205,000 livres de poisson d'une valeur de \$12,791,000. Cette prise a diminué de 18 p. 100 quant au volume et de 16 p. 100 quant à la valeur, au regard de celle (371,901,000 livres et \$15,255,000) de juillet 1954.

Au cours des sept premiers mois de la présente année, les débarquements (972,902,000 livres évaluées à \$42,623,000) ont été réduits par rapport à ceux (1,024,126,000 livres et \$44,906,000) de la période correspondante de l'an dernier.

ATLANTIQUE

Sur la côte de l'Atlantique, la prise de juillet s'est chiffrée par 278,358,000 livres, diminution de 15 p. 100 sur les 326,513,000 livres de juillet 1954 et sa valeur s'est établie à \$7,555,000, diminution de 18 p. 100 par rapport à \$9,230,000.

Les pêcheurs de Terre-Neuve ont débarqué 189,525,000 livres de poisson, soit 16 p. 100 de moins qu'en juillet 1954 (226,714,000). La valeur de cette pêche (\$4,125,000) était inférieure de 26 p. 100 à celle (\$5,594,000) d'une année auparavant.

La prise de la Nouvelle-Ecosse et sa valeur (54,071,000 livres et \$2,317,000) étaient supérieures, respectivement, de 15 et de 7 p. 100 à celles (47,045,000 livres et \$2,165,000) du même mois en 1954.

PACIFIQUE

En Colombie-Britannique, la valeur totale de la prise de juillet a été de \$5,236,000, soit environ 13 p. 100 de moins qu'au cours de juillet 1954.

Les débarquements de flétan se sont établis à 3,041,000 livres et ont été évalués à \$438,000. La prise de saumon (19,752,000 livres) a enregistré une valeur de \$4,223,000, soit environ 15 p. 100 de moins qu'en juillet 1954.

STOCKS

A la fin de juillet, les stocks de poisson congelé au Canada se sont établis à 47,328,000 livres et comptaient 44,542,000 livres de poisson frais et 2,786,000 livres de poisson fumé. Comparativement à la fin de juillet 1954, les stocks de poisson frais congelé avaient augmenté de 27,000 livres et ceux de poisson fumé, de 397,000 livres.

EXPORTATIONS

Durant les sept premiers mois de 1955, le Canada a exporté pour \$69,065,000 de poisson et de produits du poisson, soit \$3,048,000 de moins que les \$72,113,000 de la période correspondante, l'an dernier.

OTHER SHELLFISH	- crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - AUGUST 1955

CANADA

In August the sea-fisheries of Canada yielded 241,126,000 lb. of fish worth \$13,821,000 -- a catch that was 8% smaller and 4% less valuable than the 262,386,000 lb. worth \$14,370,000 taken in August, 1954.

Landings in the first eight months of this year -- 1,214,267,000 lb. valued at \$56,484,000 -- were 6 and 5% lower respectively than the 1,293,534,000 lb. worth \$59,457,000 reported in the same period of last year.

ATLANTIC

On the Atlantic Coast the August catch amounted to 179,200,000 lb. -- 13% under the 206,384,000 lb. recorded in August, 1954 -- and was valued at \$6,034,000 -- 5% lower than the \$6,362,000 reported for the same month of last year.

Newfoundland fishermen landed 87,334,000 lb. of fish, 27% lower than the 119,403,000 lb. taken in August, 1954. The value, \$2,000,000, was 28% under the \$2,781,000 shown a year ago. The cod catch has fallen off appreciably this year.

In Nova Scotia the picture would appear to be somewhat brighter. Landings in August totalled 49,079,000 lb. and were valued at \$1,862,000 compared to August 1954 figures of 38,761,000 lb. and \$1,682,000. As a whole, the groundfish catch was higher, both during the month and in the January-August period. However, the value of the lobster catch continues on a slightly lower level than last year.

PACIFIC

In British Columbia the value of the August catch was \$7,787,000, some 3% lower than the \$8,008,000 reported in the same month of 1954. Salmon landings totalled 56,285,000 lb. and were worth \$7,025,000 as compared with 49,716,000 lb. worth \$6,938,000 reported in August, 1954. The halibut catch of 3,134,000 lb. was valued at \$480,000.

STOCKS

At the end of August stocks of frozen fish in Canada amounted to 54,656,000 lb., of which 52,163,000 lb. were frozen fresh and 2,493,000 frozen smoked. Compared to the end of August 1954 figures, current stocks were higher by 928,000 lb. (2%) fresh, but lower by 141,000 lb. (5%) smoked.

EXPORTS

During the first eight months of this year fish and fish products to the value of \$79,317,000 were sold abroad, approximately 5% less than the \$82,642,000 worth exported in the same period of 1954. Sales of fillets and sticks, salted fish, shellfish, meal and oils have risen, but not enough to offset the big decline in exports of canned salmon.

LA PÊCHE AU CANADA, EN AOÛT 1955

CANADA

En juillet, la pêche maritime au Canada a donné 241,126,000 livres de poisson d'une valeur de \$13,821,000, soit une diminution de 8 p. 100 quant au volume et de 4 p. 100 quant à la valeur sur celle d'août 1954 (262,386,000 livres valant \$14,370,000).

Les débarquements des huit premiers mois de l'année (1,214,267,000 livres évaluées à \$56,484,000) sont en baisse de 6 et 5 p. 100, respectivement, sur ceux de la période correspondante de 1954 (1,293,534,000 livres valant \$59,457,000).

ATLANTIQUE

Sur la côte de l'Atlantique, la prise d'août a atteint 179,200,000 livres (soit 13 p. 100 de moins que les 206,384,000 livres d'août 1954) d'une valeur de \$6,034,000 (soit 5 p. 100 de moins que les \$6,362,000 d'août 1954).

Les pêcheurs de Terre-Neuve ont débarqué 87,334,000 livres de poisson, soit 27 p. 100 de moins qu'en août 1954 (119,403,000). La valeur de la pêche (\$2,000,000) a été de 28 p. 100 inférieure à celle d'août 1954 (\$2,781,000). La prise de morue a sensiblement baissé cette année.

La situation semble un peu plus brillante en Nouvelle-Écosse. Les débarquements d'août ont totalisé 49,079,000 livres (\$1,862,000) contre 38,761,000 (\$1,682,000) en août 1954. Dans l'ensemble, la prise de poisson de fond a été plus forte aussi bien en août qu'en la période de janvier-août. La valeur de la prise de homards, cependant, continue d'être légèrement inférieure à celle de l'an dernier.

PACIFIQUE

La valeur de la pêche en Colombie-Britannique a été de \$7,787,000 en août, soit 3 p. 100 de moins que celle d'août 1954 (\$8,008,000). Les débarquements de saumon ont totalisé 56,285,000 livres (\$7,025,000) contre 49,716,000 (\$6,938,000) en août 1954. La prise de flétan (3,134,000 livres) valait \$480,000.

STOCKS

A la fin d'août, les stocks de poisson congelé au Canada atteignaient 54,656,000 livres, dont 52,163,000 livres de poisson frais et 2,493,000 livres de poisson fumé. Au regard de la fin d'août 1954, les stocks de poisson frais étaient de 928,000 livres (2 p. 100) plus élevés, mais ceux de poisson fumé étaient de 141,000 (5 p. 100) plus faibles.

EXPORTATIONS

Durant les huit premiers mois de 1954, le Canada a vendu à l'étranger pour \$79,317,000 de poisson et de produits du poisson, soit 5 p. 100 de moins qu'en les mêmes mois de 1954 (\$82,642,000). Les ventes de filets et bâtonnets, de poisson salé, de mollusques et crustacés, de farine et d'huile de poisson ont augmenté, mais pas assez pour contre-balancer la grande baisse des exportations de saumon en conserve.

LA PÊCHE AU CANADA, EN SEPTEMBRE 1955

CANADA

En septembre, la pêche maritime du Canada a donné 162,884,000 livres de poisson d'une valeur de \$8,793,000, soit une diminution de 15 p. 100 quant au volume et de 24 p. 100 quant à la valeur sur celle de septembre 1954 (190,642,000 livres et \$11,504,000).

ATLANTIQUE

Sur la côte de l'Atlantique, la prise de septembre a atteint 122,381,000 livres (13 p. 100 de moins que les 140,665,000 d'un an plus tôt), d'une valeur de \$4,202,000 (11 p. 100 de moins que les \$4,731,000 de septembre 1954).

Les pêcheurs de Terre-Neuve ont débarqué 46,242,000 livres de poisson, volume inférieur de 27 p. 100 à celui (63,624,000) de septembre 1954. La valeur de la pêche (\$1,117,000) a été de 28 p. 100 inférieure à celle (\$1,545,000) d'une année auparavant.

Une comparaison avec les données de septembre 1954 révèle que, parmi les provinces de l'Atlantique, la Nouvelle-Ecosse a été la seule à déclarer un volume accru de ses débarquements. La prise (43,457,000 livres) l'a emporté de 13 p. 100 sur celle (38,579,000) d'un an plus tôt, mais la valeur (\$1,515,000) n'a été que légèrement supérieure à celle (\$1,507,000) du même mois de l'an dernier.

PACIFIQUE

En Colombie-Britannique, la valeur totale (\$4,591,000) des débarquements de septembre s'est élevée de 32 p. 100 au-dessus de celle (\$6,773,000) d'un an plus tôt.

La prise de saumon, que constituait 97 p. 100 de tous les débarquements, a été évaluée à \$4,240,000, soit environ les deux tiers des \$6,418,000 de septembre 1954.

STOCKS

A la fin de septembre, les stocks de poisson congelé au Canada atteignaient 53,892,000 livres, dont 51,283,000 livres de poisson frais et 2,609,000 livres de poisson fumé. Comparativement à la fin de septembre 1954, les stocks (6,417,000 livres) de poisson frais avaient été réduits de 11 p. 100 ou de 6,417,000 livres et ceux de poisson fumé s'étaient accrus de 12 p. 100 ou de 272,000 livres.

EXPORTATIONS

Durant les neuf premiers mois de la présente année, le Canada a exporté pour \$93,529,000 de poisson et de produits du poisson, soit environ 2 p. 100 de moins qu'au cours de la même période de 1954 (\$95,211,000).

FISHERIES OF CANADA - OCTOBER 1955

CANADA

During October the sea-fisheries of Canada yielded 96,419,000 lb. of fish worth \$4,205,000. This catch was 47% smaller and 38% less valuable than the 182,723,000 lb. worth \$6,779,000 landed in October, 1954.

Landings in the first ten months of this year -- 1,492,091,000 lb. worth \$69,533,000 -- were 10 and 8% lower respectively than the 1,666,404,000 lb. worth \$77,795,000 reported in the same period last year.

ATLANTIC

On the Atlantic Coast the October catch amounted to 82,119,000 lb. -- 18% higher than the 69,409,000 lb. reported in October, 1954, -- and was valued at \$2,533,000. This was a 12% increase as compared with the \$2,265,000 recorded for the same month of last year.

Newfoundland fishermen landed 32,353,000 lb. of fish 18% higher than the 27,383,000 lb. taken in October, 1954. The value \$785,000, was 19% more than the \$662,000 shown a year ago.

Nova Scotia reported an increase in the volume of landings for October. The catch -- 28,737,000 lb. -- was 17% higher than the 24,550,000 lb. taken in October, 1954. The value of the catch was recorded at \$991,000 -- 9% more than the \$908,000 reported for the corresponding period of last year.

PACIFIC

In British Columbia the total value of fish landed in October, \$1,672,000 was 63% less than the \$4,514,000 realized by the fishermen in October, 1954.

The salmon catch was valued at \$1,453,000 -- 58% lower than the \$3,434,000 reported for October, 1954.

STOCKS

At the end of October stocks of frozen fish in Canada amounted to 52,634,000 lb. of which 50,102,000 lb. were frozen fresh and 2,532,000 lb. frozen smoked. Compared to the end of October, 1954 figures, current stocks were lower by 9,505,000 lb. (16%) fresh, but higher by 48,000 lb. (2%) smoked.

EXPORTS

During the first nine months of this year \$93,529,000 worth of Canadian fish and fish products were exported, approximately 2% less than the \$95,211,000 sales reported in the same period of 1954.

LA PÊCHE AU CANADA, EN OCTOBRE 1955

CANADA

La pêche maritime au Canada en octobre a donné 96,419,000 livres de poisson, d'une valeur de \$4,205,000, soit une diminution de 47 p. 100 quant au volume et de 38 p. 100 quant à la valeur par rapport à octobre 1954 (182,723,000 livres et \$6,779,000).

Les débarquements des dix premiers mois de l'année en cours, c'est-à-dire 1,492,091,000 livres, d'une valeur de \$69,533,000, sont, respectivement, de 10 et 8 p. 100 de moins que les 1,666,404,000 livres, valant \$77,795,000, de la même période l'année dernière.

ATLANTIQUE

Sur la côte de l'Atlantique la prise d'octobre a atteint 82,119,000 livres, soit 18 p. 100 de plus que les 69,409,000 livres d'il y a un an, et elle vaut \$2,533,000; augmentation de 12 p. 100, par conséquent, sur les \$2,265,000 du mois correspondant l'année dernière.

Les pêcheurs de Terre-Neuve ont débarqué 32,353,000 livres de poisson, soit 18 p. 100 de plus que les 27,383,000 livres d'octobre 1954. La valeur de la pêche (\$785,000) est de 19 p. 100 supérieure à celle d'il y a un an (\$662,000).

En Nouvelle-Ecosse les débarquements en octobre ont été plus élevés. La prise, à 28,737,000 livres, est de 17 p. 100 plus élevée que les 24,550,000 livres d'octobre 1954. Sa valeur, à \$991,000, est de 9 p. 100 de plus que les \$908,000 déclarés pour la période correspondante de l'année dernière.

PACIFIQUE

En Colombie-Britannique, la valeur totale des débarquements en octobre, à \$1,672,000, est de 63 p. 100 de moins que les \$4,514,000 qu'ont touchés les pêcheurs en octobre 1954.

La prise de saumon est évaluée à \$1,453,000, c'est-à-dire 58 p. 100 de moins que les \$3,434,000 déclarés en octobre 1954.

STOCKS

A la fin d'octobre, les stocks de poisson congelé au Canada atteignaient 52,634,000 livres, dont 50,102,000 livres de poisson frais et 2,532,000 livres de poisson fumé. Si l'on compare ces chiffres à ceux de la fin d'octobre 1954, les stocks de poisson frais sont de 9,505,000 livres de moins, ou 16 p. 100, tandis que ceux de poisson fumé sont de 48,000 livres de plus, ou 2 p. 100.

EXPORTATIONS

Durant les neuf premiers mois de l'année en cours, le Canada a exporté pour \$93,529,000 de poisson et de produits du poisson, soit environ 2 p. 100 de moins que les \$95,211,000 de ventes déclarées au cours de la même période en 1954.

OTHER SHELLFISH - crab, mussel, winkle	- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - NOVEMBER 1955

CANADA

During November the sea-fisheries of Canada yielded 116,889,000 lb. of fish worth \$2,876,000 to the fisherman. This catch was 15% smaller and 24% less valuable than the 137,856,000 lb. worth \$3,792,000 taken in November, 1954.

Landings in the first eleven months of this year -- 1,592,548,000 lb. valued at \$73,413,000 -- were 12 and 10% lower respectively than the 1,804,258,000 lb. valued at \$81,586,000 landed in the same period of last year.

ATLANTIC

On the Atlantic Coast the November catch amounted to 46,346,000 lb. -- 22% less than the 59,546,000 lb. reported in November, 1954 -- and was valued at \$1,670,000, which was 18% lower than the \$2,046,000 recorded for the same month of last year.

Newfoundland fishermen landed 17,530,000 lb. of fish -- 25% less than the November, 1954 catch of 23,428,000 lb. The value of the landings -- \$360,000 -- was 23% below last November's figure of \$466,000.

In Nova Scotia the November landings -- 18,652,000 lb. worth \$713,000 -- were down by 32 and 28% from the 27,591,000 lb. worth \$996,000 recorded in November, 1954. However, the January-November landings were fractionally higher in value this year.

PACIFIC

On the Pacific Coast the total value of fish landed in November -- \$1,206,000 -- was 31% less than the \$1,746,000 realized by the fishermen in November, 1954. This decline may be attributed in main to the light run of chums, although unseasonable cold weather in the middle of the month was also a contributing factor.

STOCKS

At the end of November stocks of frozen fish in Canada amounted to 45,494,000 lb., of which 43,254,000 lb. were frozen fresh and 2,240,000 lb. frozen smoked. Compared to the end of November, 1954 figures, current holdings were lower by 13,246,000 lb. (23%) fresh and by 282,000 lb. (11%) smoked.

EXPORTS

During the first ten months of this year \$106,079,000 worth of Canadian fish and fish products were exported -- approximately 1% less than the \$107,114,000 sales reported in the same period of 1954.

LA PECHE AU CANADA, EN NOVEMBRE 1955

CANADA

La pêche maritime au Canada en novembre a donné 116,889,000 livres de poisson, d'une valeur de \$2,876,000, soit une diminution de 15 p. 100 en volume et de 24 p. 100 en valeur par rapport aux 137,856,000 livres, d'une valeur de \$3,792,000 en novembre 1954.

Les débarquements durant les onze premiers mois de cette année, c'est-à-dire 1,592,548,000 livres d'une valeur de \$73,413,000 sont, respectivement, de 12 et de 10 p. 100 de moins que les 1,804,258,000 livres évaluées à \$81,586,000 durant la même période l'année dernière.

ATLANTIQUE

Sur la côte de l'Atlantique la prise de novembre a atteint 46,346,000 livres, soit 22 p. 100 de moins que les 59,546,000 livres déclarées en novembre 1954. Sa valeur, à \$1,670,000 est de 18 p. 100 de moins que les \$2,046,000 du même mois il y a un an.

Les pêcheurs de Terre-Neuve ont débarqué 17,530,000 livres de poisson, c'est-à-dire 25 p. 100 de moins que la prise de novembre 1954 qui a été de 23,428,000 livres. La valeur, à \$360,000, est de 23 p. 100 de moins que les \$446,000 de novembre dernier.

En Nouvelle-Ecosse les débarquements en novembre ont atteint 18,652,000 livres d'une valeur de \$713,000; une baisse de 32 et de 28 p. 100 par rapport aux 27,591,000 livres évaluées à \$996,000 en novembre 1954. Toutefois, ceux de janvier-novembre sont fractionnairement plus élevés en valeur cette année.

PACIFIQUE

Sur la côte du Pacifique la valeur totale des débarquements de poisson en novembre, à \$1,206,000, est de 31 p. 100 de moins que les \$1,746,000 qu'ont touchés les pêcheurs en novembre 1954. Cette baisse est surtout attribuable à la faible montée du bécard, bien que le froid non saisonnier du milieu du mois ait lui aussi été un facteur qui ait contribué à cette baisse.

STOCKS

A la fin de novembre, les stocks de poisson congelé au Canada ont atteint 45,494,000 livres, dont 43,254,000 livres de poisson frais et 2,240,000 livres de poisson fumé. Si l'on compare ces chiffres à ceux de novembre 1954, les stocks courants de poisson frais sont de 13,246,000 livres, ou 23 p. 100 moins élevés, et ceux de poisson fumé, de 282,000 livres ou 11 p. 100 moins élevés.

EXPORTATIONS

Durant les dix premiers mois de l'année en cours, le Canada a exporté pour \$106,079,000 de poisson et de produits du poisson, c'est-à-dire 1 p. 100 environ de moins que les \$107,114,000 de ventes déclarées au cours de la même période en 1954.

- abalone, octopus, prawn, shrimp

FISHERIES OF CANADA - DECEMBER 1955

CANADA

Landings in the sea-fisheries of Canada in December -- 154,194,000 lb. valued at \$5,184,000 -- were 21 and 11% higher respectively than the 119,098,000 lb. worth \$4,364,000 reported in December, 1954.

These increases, however, were not enough to compensate for losses shown in previous months, the reported total value of the 1955 catch -- \$77,599,000 -- being approximately 10% below the comparable figure for 1954.

PACIFIC

On our West Coast the December catch increased sharply over that taken in the same month of 1954, the value rising some 74% from \$1,053,000 to \$1,837,000. This increase may be attributed almost wholly to the herring fishery, the value of which jumped to \$1,683,000 from \$914,000 in the previous year.

During 1955 the value of all three major Pacific fisheries declined appreciably from the 1954 level; salmon by 22% to \$18,342,000 from \$23,579,000; halibut 38% to \$2,469,000 from \$3,984,000; and herring 9% to \$4,170,000 from \$4,565,000.

ATLANTIC

On the Atlantic Coast the December catch totalled 33,334,000 lb. -- 23% less than the 43,569,000 lb. recorded in December, 1954 -- whereas the value, \$3,347,000, was slightly higher than the \$3,311,000 reported in the same month a year before.

During 1955 East Coast fishermen landed 1,254,652,000 lb. of fish worth \$49,399,000, as against 1,324,279,000 lb. worth \$50,685,000 taken in 1954. Except in Quebec, the lobster fishery proved more rewarding this past year. In contrast, the aggregate cod catch slipped from a value of \$16,263,000 in 1954 to one of \$13,809,000 in 1955, the decrease being most prominent in Newfoundland.

STOCKS

At the end of December stocks of frozen fish in Canada amounted to 38,441,000 lb., of which 36,273,000 lb. were frozen fresh and 2,169,000 lb. frozen smoked. Compared to the end of December, 1954, stocks current holdings were lower by 10,737,000 lb. (23%) fresh and by 300,000 lb. (12%) smoked.

EXPORTS

In the first eleven months of 1955 Canadian fish and fish products to the value of \$117,508,000 were exported, approximately 4% less than the \$122,210,000 sales reported in the same period of 1954.

LA PECHE AU CANADA, EN DECEMBRE 1955

CANADA

La pêche maritime au Canada en décembre a donné 154,194,000 livres de poisson, d'une valeur de \$5,184,000, soit une augmentation de 21 p. 100 en volume et de 11 p. 100 en valeur par rapport aux 119,098,000 livres d'une valeur de \$4,364,000 enregistrées en décembre 1954.

Cette augmentation n'a cependant pas suffi pour compenser les pertes enregistrées au cours des mois précédents. La valeur totale de la prise de 1955 serait de \$77,599,000, c'est-à-dire inférieure d'environ 10 p. 100 au chiffre correspondant de 1954.

PACIFIQUE

Sur la côte accidentale, les débarquements ont augmenté sensiblement par rapport à ceux des mêmes mois en 1954, et leur valeur s'est accrue de 74 p. 100 pour passer de \$1,053,000 à \$1,837,000. Cette hausse peut être attribuée presque entièrement à la pêche du hareng, dont la valeur a bondi à \$1,683,000, de \$914,000 qu'elle était l'année précédente.

Au cours de 1955, la valeur des trois principales pêches du Pacifique a décru de façon appréciable par rapport au niveau de 1954: le saumon, (22 p. 100) de \$23,579,000 à \$18,342,000; le flétan (38 p. 100) de \$3,984,000 à \$2,469,000; et le hareng (9 p. 100) de \$4,565,000 à \$4,170,000.

ATLANTIQUE

Sur la côte de l'Atlantique la prise de novembre a atteint 33,334,000 livres, soit 23 p. 100 de moins que les 43,569,000 livres enregistrées en décembre 1954. Sa valeur, à \$3,347,000, était légèrement supérieure à celle du même mois un an plus tôt.

Au cours de 1955, les pêcheurs de la côte de l'Atlantique débarqué 1,254,652,000 livres de poisson, d'une valeur de \$49,399,000, contre 1,324,279,000 livres, d'une valeur de \$50,685,000, en 1954. Sauf au Québec, c'est la pêche au homard qui a été la plus profitable cette année. Par contre, la prise globale de morue a glissé en valeur de \$16,263,000 en 1954 à \$13,809,000 en 1955; la baisse s'est surtout fait sentir à Terre-Neuve.

STOCKS

A la fin de décembre, les stocks de poisson congelé au Canada atteignaient 38,441,000 livres dont 36,272,000 livres de poisson frais et 2,169,000 livres de poisson fumé. Si l'on compare ces chiffres à ceux de la fin de décembre 1954, les stocks courants de poisson frais étaient inférieurs de 10,737,000 livres (23 p. 100) et ceux de poisson fumé, de 300,000 livres (12 p. 100).

EXPORTATIONS

Au cours des onze premiers mois de 1955, le Canada a exporté pour \$117,508,000 de poisson et de produits du poisson, c'est-à-dire environ 4 p. 100 de moins que les \$122,210,000 de ventes déclarées pour la même période en 1954.
